# You Were Going to Give Blood?

TELL IT TO THIS MARINE!

What are the chances of a wounded GI coming through?

That depends—on blood. Without blood, fatalities would go up sharply. With blood, we save 97 out of every 100 who reach even the most forward hospitals.

So blood will tell. Your blood.

Of course you intend to give blood. The butcher, the banker, the milkman, the mayor ... all Americans are "rolling up their sleeves" these days ... giving cheerfully, proudly.

But wounds won't wait ::: right now, your Armed Forces are short 300,000 pints of blood a month. We're dipping into precious

reserves ::: scraping the bottom of a barrel that should be overflowing if our men are to live to fight for democracy!

Make that date today, won't you? And keep it. Don't wait till it's too late. There's no percentage in one American giving his blood the hard way . . . when you can save it the easy way.
