LEVERAGE gives a POWER "PLUS"

to the new

FERGUSON TRACTOR

A tractor has got to have power to spare. That's a must. But power to do the heavy work is not a matter of great size, overweight, or clumsy operation. How much and how efficiently power is applied to the implement... that's what counts.

The specially-designed overhead-valve engine of the New Ferguson Tractor, combined with the one and only Ferguson System of Linkage and Hydraulic Control, provides adequate power fully utilized.

Power properly managed for the wide range of work is the power-principle of the New Ferguson. Power combined with leverage! Whether you judge tractor performance by how easy it makes your work, the time saved, or by how much it lowers your cost of production, ask for your demonstration now.

It's the FERGUSON SYSTEM that makes the difference!

POWER THAT SPELLS LOW-WEAR CO-ST

Continental overhead-valve engine has the reverse third gear when you would expect to need second, saves an end.
