There was not much room for Jesus when He came-only a manger. The inn was too crowded and exclusive. Herod's palace had no room for Him, Herod's soldiers hunted Him, synagogues closed their doors against Him, society found no place for Him, officialdom frowned upon Him. "He came unto His own, and His own received Him not." He had not place to lay His head in the world He had created. His earthly possession consisted of a borrowed grave. But He who "became poor that we might be rich", knew that the cattle on a thousand hillsides, the riches of a thousand

True Christians of every kind are aiming to insure that the celebration of the Saviour's birth will not be overshadowed by Santa Claus, prancing reindeers, gaily decorated evergreens or clanging registers.

Someone has told us the story of the little girl, who as the yuletide approached, became increasingly excited about Santa Claus, stockings at the chimney, and all the other tinsel trappings of the season. She became so deeply perturbed that on the night before the long-awaited day, as she knelt to pray, she became very much confused. In praying the Lord's prayer, when she came to the petition, "forgive us our trespasses", she forgot herself and said, "forgive us our Christmases". Too often, when we observe the way in which many commemorate this day, it is easy to see

mases". It is good that the Christmas season is emphasized. Millions of devout Christian people will have lighted Christmas trees in their homes, churches and places of assembly. They will join in purchasing billions of stamps which will bear the birth date of the Saviour. They will spend millions of dollars on which His birth date has been stamped by the government, and they will be exchanging legal documents which would have ter how we try. no value if it were not for that birth date stamped upon. Are community get-togethers becoming a thing of the past? Where parents bring their children and over a pot luck supper talk over news of the day, meet new neighbors and greet old friends? When a community has increased at least some 40 new families it is very disheartening to have some 10 or 12 families and 15 or 20 children attend a Christget-to-gether with Santa, songs, gifts and Christmas stockings. It seems too bad that folks can't take a couple hours once a year to come and meet their neighbors.

This community was well were 25 couples and 56 children including the Tom Folks, the Don Hansen's, the Ed Hoffmans and John Folks. Mr. Folk was past president. WHAT CASKET SHOULD WE SELECT?

Many times a family making final arrangements for a loved one are undecided as to the casket to select. At a time like this they are confused, bewildered and many times in a state of semi-shock. In many cases there is a tendency to try and atone for things done in the past. This is a natural thing for there is no one living who cannot look back and recall things that could have been

done. Many times we are asked, 'What casket should we select?' This question is one that is impossible to answer by a truly ethical funeral director. The decision rests fully with those making the arrangements.

We stand ready to show and explain the difference in the units and why one costs more or less than another. One of the guiding rules for a selection should be based upon the level and station in life of the deceased, and the likes and desires of those making the arrangements.

When asked this question the only true answer a funeral director can give is, "Your selection should be whatever will give you the greatest peace of mind within the range you desire to spend, be that the least inexpensive or a solid bronze."

I've really flipped my lid but don't judge me too quick. I have come to the conclusion that this country of ours, if it is to stay free and ever to become solvent, must have another elected official on the ballot at all levels on election day.

Any business worth it's salt, once faced with the fact that they are going backwards faster than they are forging ahead, soon calls upon an efficiency expert to help solve their troubles. Where are the efficiency experts in government? For is it not the biggest business of all? We need them. We need someone in all levels of government with access to any and all government files, meetings, functions, and restricted areas. We need people in these posts answerable to no one other than the public, by making their findings known through the American press.

Let me give you an example of what an efficiency

expert could have uncovered here in the State of Wash. under your very noses, these many years.

I must bring aviation into this article to bring about my point but be this as it may, it is in this field that I recently had my eyes opened to the great possibility of the American taxpayers supporting a white elephant to the tune of 'What we don't know won't hurt us!'

Residents of the city of Richland have long had a large airport right in their back yard. It was a known fact that this airport was complete with excellent Ave., and Rev. Edwin L. blacktop runways, a control tower, tetrahedron and all Coy, Pastor, invite everythat goes to make up a really fine facility. This airport one to their Christmas serwas the Atomic Energy Commission airport and as such vices starting in the mornwas taboo for any and all except AEC and military ing with an early morning planes. Those in richland that fly have flown off a service at 8:30 a.m. The rockpile that is about the poorest excuse for an music will be lead by Mr. airport immaginable for many years.

The local port commission had for years tried to tor will speak on "Is It get this airport cleared for joint use. It has finally Too Much to Ask That come to pass, for the simple reason that people living There Be Room For God's near the airport would go for weeks on end without Son.' hearing or seeing a plane taking of or landing at the airport. Talk about this was, I believe, largely School superintendent, will responsible for the AEC finally agreeing to open the field to the public.

I was the last person required to go through official channels to land at the field and the first fly out legally

under the new open door policy there. On this particular visit during the signing of the

lease, I found a beautiful airport that you and I have a.m been maintaining for years. It has an excellent tower, solo by Edwin L. Coy Jr., complete with all the required radio equipment and

manned 24 hours a day. what the function of a tower is. It is to control traffic In The Inn." at an airport with more than normal activity whereby danger of collision may occur. In my mind I have always imagined the Richland AEC field to be a bustling airport, like McChord or Paine Field, and as such I would be the last to yell "Foul" about my tax dollar going to support it but.... after an afternoon at Richland the most I could get anyone to admit to was two "The or three planes a month using the airport there. Most hem," airports with towers in the northwest have that much

traffic every ten minutes. For all these years since World War II, cost of soloists will be Mrs. Harsupporting this great white elephant has rested on our old Wilcher, Mrs. William

This one, through the efforts of the people of Rich-nd has come to light but how many more such mon-Duet numbers will be given land has come to light but how many more such monstruous parasites are we supporting that are hidden

behind restricted area signs? Assuming that we had elected an efficiency expert on the national or state level several years ago it's a cinch he would have long since discovered this waste of tax money and through the very hue and cry of you service will be held in the The event will be spon- are thrown forcibly against would have long since been taken.

Now for the final straw. . . The AEC plans to continue to man this tower for the sole purpose of serving day we celebrate on Christit's own and military planes only, and will not aid nor mas. direct civilian traffic. The reason given is only that time will be set aside for when they agreed to open the airport to the public that all those who wish to worthey did not agree to furnish tower service as well. ship. So until Mr. and Mrs. taxpayer who now know the secret behind the taboo signs at the AEC airport put up a howl, the boys will still draw wages for acting as controller in a tower serving 10 minutes worth of activity per

I think the people of Richland and the aviation industry will soon see that corrective action is taken within the month or else I sadly misjudge the American taxpayer.

The other day I stepped out of my plane and Jerry this very interesting Hedlund who was traveling with me said, "Hey, Look at the steam coming off my hands and they aren't even wet. Wonder how come?' I couldn't figure it out either but I suddenly decided I needed my heavier coat and started to rumage through the baggage compartment for it. The next day we happened to be reading the paper and discovered the reason. Seems we had landed at the coldest spot in America that day.
