### No Chuckles in the Audience

Having engineered a widespread misinterpretation about the tisting of the name "Fingy" in last week's Mouring Mass staff box, I feet compelled to give a brief explanation of who "Fingy" is and how his name came to be fissed in the staff box.

I have been informed that a certain person on compus, a se non who had previously applied for a position outlie Morning Most staff, and who did not gain the position which he rought, has taken the listing of Progy as a personal insult; that he believes I have deliberately made some fund at a Miliation between him and lingy. Though there was absolutely no intent, I can see, now how the reference applied perhaps be milinterpretaed.

To bug in with, Fingy was a gift from my mother when I was nine years aid. Fingy is about four and a half feet high, plump, woors traditional American tenns shows, and resembles quite closely an Oranguano. He has remained in My room at home for over ten years until I brough than to school two continued to be found of him through the years. I missed his smile

I eventually brought Fingy to my office and decided to place Fingy at my desk when I was out, with my glasses on, my pen in his hand, and studying intently my logic book. Needless to say Fingy has been received quite well by the staff—being the jolly chap that he is. One night while the staff was laying out the weekly paper, Fingy became a subject of levity. The suggestion was brought forth that we include him in our staff box. With a chuckle around the table we decided to do it—never realizing what might happen. We also had planned to reveal his true identity in a coming issue, thinking the Mast audience would get a chuckle out of him. Unfortunately, Fingy has become a very bad joke; unintentionally, at any rate, by the Mooring Mast.

No associations were intended at thought of at the time, What was originally an ostensible "funny Ha-Ha" has become rether an unfortunate misinterpretation.

I think it regretable that every action or object must be viewed as symbolic or indicative or ulterior motives.

-David Giles

## **Nixon Acts to End IV-D Exemption**

By THOMAS R. HEAVEY

The President today also asked that special exemptions for divinity students he ended by Congressional and Executive Order action. Under the President's proposals, those would be a research through January 27, 1971."

The above is from a profit to he from a profit to the DIM of the he planted of February. The full in the same are not clear yet, but one we can accoming that he is never to profit an out to immunity that he is all these who don't

I infeed note a Nr. Hoffman in Northead Hundquarters of the So-ton Service System and affect this Service System and affect this Service System and affect this whom they expected to have congress act on President Mann's tenant. Mr. Hoffman soldinary but no the a careful that it brought that the Service Act and 1967 runs out.

The non-knowledge of Selective Service officials as to Congressional actions also applies to President Nixon's request or April 23 of last year to put an end to all future undergraduate student deferments.

As we see it now, in regard to the phasing out of IV-D seminary students, if you have not applied for a IV-D or you haven't been officially enrolled as a pre-seminary student under the direction of a recognized church or religious organization you will be ineligible for a IV-D exemption.

the for the occupational

plans, that you planned on going to a seminary and entering the ministry, or if you have informed your District President or another high official in the church, this information could be deemed as preparing for the ministry under the direction of a recognized church or religious organization.

Whether or not this request of Mr. Ninco's will be conside out by Congress in highly speculative, There are many people in Congress and outside who feel divinity students about the cases of this county in a matter that cases in a matter that cases in a matter that cases be served by antico cho. But, forprisingly embands, the melbrity of the charden are behind this move by the President.

In the Lutheran Church as well as all the other large churches, officials are getting upset over all the young men who are stating that they want to dedicate their lives to the church when inactuality they are attending seminary for the express purpose of avoiding the draft. It is the opinion of many seminary officials that service to one's country should not be waived simply because a young man wishes to attend the seminary, and that If a young man feels he cannot participate in war he should not avoid applying for Conscientious Objector classification by hiding behind a IV-D deferment.

The Selective Service System explains its actions by saying this move will equalize military obligations among all students, and that divinity students will be eligible, just the same as everyone etse, to apply for the remaining clasifications.

## **Production for What?**

By GLEN ANDERSON

Amidst the lamentations about the destructive earthquake in Southern California, I can't help wondering whether there might be some crocodile tears shed by building contractors, architects, and construction workers. After all, a tragedy like the earthquake is just what we need to reduce unemployment, create jobs, and spur the economy, isn't it? We need occasional fires, turnadors, earthquakes and floods: they keep the economy moving, just like planned obsolescence and shoddy quality keep Detroit busily producing more and more new cars.

Perhaps 156 coest ruction industry compiles with Mother Nature occasionally 20 perpetrate some natural calamity every once in a while. They may have caught on to the reasoning of the automobile industry, which is so reluctant 20 produce through safe cars. Every car which is needlessly totaled out must be replaced, and the manufacturers make more many booking now cors than repairing old ones.

Hundreds of millions of dollars are spent re-tooling the automobile factories for each year's new models. This is sheer waste from a practical viewpoint, but actually turns out to be a good investment from the viewpoint of the companies' owners and employees, since yearly model changes induce people to buy more cars more frequently, and thus provide profits and job security. Likewise, the loss of 48 lives, the injuries of 1000 people and the inconvenience to hundreds of thousands of others are a small price to pay for the profits which will accrue to those people in the construction industries as the destroyed facilities are rebuilt. (Just look at the way we willingly sacrifice Vietnamese lives and landscape for our nation's economic interests!) Eventually, then, we shall be back where we started; but in the mountime many people will have profited financially from this earthquake.

When people are thinking of all kinds of crackpot schemes (including SST's) to rake money into economically depressed areas of the country, how can we logically bemoan a ready-made opportunity such as the current one? It is logical to appreciate natural disasters—given our present economic system. Perhaps, then, it is our nation's economic system which is illegical and absurd.

We at: observed with production that we product very much that is worthwhile mind you furles you simply can't live without hackyand harbstonic, you coally deed all those clothes handing in your closes. and you find that the American process of completeness consumption is whally access

sary to your human existence), but [437 that we have this thing about economic productivity.

Maybe those extravagant tailfins of a decade ago wer; supposed to demonstrate our overol burger, orly over the Russiand; "In Ita ca you, Nikital Look at our troopy tailfins!" I really doubt that Nikita could give a dain for all the decadent capitalistic tailfins clurging our decadent American othes, but I think they made American or supprinted and trail the decadent american others, but I think they made American or supprinted and trails.

When the SST controversy was raging between the pro-25t forces and those of us who see to garded as unpatriotic to the State of Washington (spelled B-O-E-I-N-G), the argument most often e-ovenced in favor of building that big jurkey was that it would bring jobs to the area. Perhaps we do need to increase employment, but we must sot accept this argument unquestioningly, for it contains a dangerous implication. While the paycheck is must important to the individual worker, the rest of society ought to be concerned about what that worker's job contributes to society. Otherwise the job issue can be used to justify any kind of activity that keeps people employed. For example, it could be argued that prostitution and drug pedding should be allowed on the grounds that they provide jobs for prostitutes and drug peddlers.

Perhaps America could solve not only its connomic problems but also some of its more crucial social problems if we produced in order to meet human needs rather than in order to make excessive profits, or even in order to keep everyone employed. Quite number of people—especially young people—do not thirst for the rewards of the middle class rat-race, and want only enough food and shelter and a minimum of material goods.

Nor does the overproductive nation actually need their labors. Instead of condemning these individuals as being lazy, the American people should thank them for voluntarily removing themselves from the bulging ranks of jobseckers. Our society should provide the option for people to be unemployed or only minimally employed and still retain their buman dignity.

It is time not just to figure out bow to do better what we are doing now, but to figure out whether we ought to be doing it at all, and what we ought to be doing instead. The problem is not simply how to crawl out of our economic recession, but rather how to build an economy and a society on healthier and more humanitarian foundations.

#### Environment

# The Beauty of Big Mouths

BY DAVE SUPERLUND

A river wears many masks during the course of its travels, but the mouth of a river is surely the top candidate for the ugliest and most useless. At least, this is the usual impression.

Ever since man has emerged as the earth-raper his beady eye has been turned toward the mouth of the river as a potential "resource." Met with opposition when he moves mountains or applies the razer treatment to a forested hill, he feels safer at the river mouth, for who will speak for the inherent and giernal beauty of the mud flat and the salt marsh?

The biologist refers to the river mouth as an estuary. Although the appearance is deceiving, estuaries present a unique and important physical situation; an interface between salt and fresh water. Even that doesn't seem so important at first. Realize, however, that the battle against a change in salinity is one of the major functions of marine organisms, and that with a few notable exceptions organisms that are adapted for salt water cannot survive in fresh water, while those adapted for fresh water would dehydrate in a very short exposure to salt water.

In this light the estuary becomes a selective barrier and has been employed by various marine organisms as a sursery. Immature fish and inverte-brates that can live in low salinity water are free to develop away from predation, protected by salt barrier. The cycle of the rides continually flushes the estuary and replaces the supply of oxygenated water nutrients, as well as playing the stork to eggs and larvae that are at the mercy of the currents and that need the safety of the river mouth to develop.

Other code to see aposter side of those when viewing the estimacy, introvers. Rivers a i injund waterwhys make great transportation with a publimum of investment industries that need water continues store a river mouth, drink their fill, and pass the product down the line. What better place, than, for a harbor? It's perfect, chose to industries, close to high cities and very often choice to big cities that have rough as a result of the hardness of the material coordoo but that is a river.

On yet, it is also true that the occuse is one of our gravited remerces, one that we are transmit not amplify. They was amount of water cap assistant anything you gon give it and beg for more rulete anything you gon give it and beg for more rulete anything you gon give it and beg for more rulete anything you gon give it and to true it will courb cook a town of the cours about a carried tables about ODT threatment percent with attended to the course of the cour

The Normally River is in the wolder of a beate of bis nature now, while both Taxonna and Olympta gloot over the idea of a despessa part to the neath Sound. The Taxonna and unbed society and of her eletteras' groups are leading the opposition but there are many goods, even at this late date, who will weep over the total of another mod lies, in the past of years the majority of another major attack the past sound and parts of San Francisco and parts of San Francisco and there was a massive of spall 14 San Francisco Bay, Technia and Obrands want more whiteflat in the chards.

THE TRUE STORY OF MOSES

A good many Americans Itel strengly that priests, ministers and rabbis should never engage in policical issues-particularly when they're

The attitude that men of God should mind their own business stems, of course, from the lessons of the Bible. One of the earliest is the story

It was Moses' constant refusal to stick his nose into the worldly affairs of his congregation that set the pattern followed by all religious leaders in Biblical times.

One need only quote a few chapters from the all-too-familiar "Gospel According to St. Pontius" to convince interfering clerics they should stay out of public affairs and tend to their knitting. Excerpts follow.

And the Lord spales unto Mores out a! the bureing buch, saying, ! have surely some the utilication of my people which are in Picrot and I would deliver their from the Pharault.

And Moree replied envior O. Land traylury | should in il on my hores before the Pharman and of y unto blue. Les my passic got

And the Lord freewind, crying captly auto Mines. There art a man of God, got a libbyon, floid thy inngue.

And Money bold his torque. And a customittee of hymne among the Invacintus had them and of Exper men the shores of the Red See. But the Egyptians around than, of the horses and charitro of the Phartell, and syertook inco.

And the children of larnet hill on their haust and creed our to Morea. egrics. Park the seaton of the past that on suff creat in dry grant? threadow the easers to char spins and produce to our entitles.

But Mante raid were district a past of God, and a Systemitic ong-Det for to I come after with party party.

And, sentence the I working crossed the that See 406 extered the Down of Sinal where, being led by a committee, they wandered for farty years, men of the committee wishing to go this way and men

Azat the children of larged crited out to litting, storing. Guide us to the Promised Land of milk and borny, And Mores replied, buying, I will not other controversies over laying dome guidelings. Such is out the Province of a man of Ond

And, being of thirst, they begand him to emin a rock with his staff wood bride hard water But he said was there, flow then sak a come of God to develop + Sinal Water Plas?

And Muses word up onto himse Shat and the Lord spake more thin, saying, I have writ Ten Commandments on dome 1000 tables of dome for my people And Morre asket. O. Lard. Call J man thy Ten Communi regord down to thy people and read them with them?

And the Lord fround, crying courtly auto blines, I have Act a mind of Fod. It is not for that to 80 around introducing legislative programs. Mind ditto over business.

And so the children of Israel reached The Promised Land. And there Moses taught them bings and whist and organized for them socials and supers and the ladies solidality. And he grew old in years, rich is honors and in the respect of his flock.

And on his death bed, he spake prophecy, saying unto his successor, Joshua: If thou wouldnt be revered as a shepherd, avoid controversy, eachers strife, care not for the hunger, the thirst or the wants of thy flock. All who follow this creed shall be respected men of God.

And, in so it came to pass. (Copyright Chronicle Publishing Co. 1971)

# Rev. Nesvig Relates Sabbatical Tour

By GREG YOCK

Rev. Milton Nesvig returned last month from an eight-month sabbatical tour which took him to 30 countries around the world. The purpose of the tour, granted to him by the University Board of Regents was twofold. He studied Lutheran church-mission activities in diverse areas of the world and visited PLU alumni whose efforts have been instrumental in the conduction of those activities in such fields as education, government, science, and the arts.

Rev. Nesvig, whose current assistantship to President Wiegman includes responsibility for all official University publications and church relations, left with his wife early last summer for Koppom, Sweden where the tour commenced. In the early stages of the journey he was with PLU's Choir of the West.

In his visit to Norway, Rev. Nesvig studied the unique sociospiritual ministry of the Lutheran Church, where television, raido, and newspaper are employed on a phenomenal scale.

Other European nations visited by PLU's representative included Denmark, Belgium, Germany, Spain, Switzerland, Holland, Austris, and France,

In Evian, France Rev. Nesvig attended the Lutheran World Federation Convention and was the only reporter there representing an American daily newspaper. He commented that he applied for press passes from the Tacoma News Tribune and Seattle Times in order to be admitted to the convention.

Among those who hosted the Nesvigs in Europe were U.S. Navy Chaptain Steve Brandt (PLU '57) in Rota, Spain; Mr. Hans Mollerup (PLU '67) in Copenhagen, Denmark; and Mrs. Marilyn Pflueger Schmutter (daughter of J. P. Pflueger, after whom Pflueger Hall is named) in Bonigheim, Germany.

Rev. Neevig traveled through Yugoslavia to Athens, Greece, and from there he and his wife flew to Kenya. Africa where they were welcomed by Barak Mbajah (PLU '67), now a district officer in charge of the welfare of nine tribes. Rev. Nesvig observed the work of Christian missionaries and arrended a number of native African ceremonies and suppers.

"In every village we visited," he said, "the chief and sub-chiefs and all the people were lined up to reprive us." They presented him with many gifts, including a bow and arrow, two chickens, and a walking stick.

In Tanzania, Africa, as the guest of Rev. and Mrs. Robert Ward, the Nesvigs spent several days in the bush, and had the opportunity

# freedom: beyond homeostasis

By BURTON L NESSET

Freedom - I sit and look at that word, and consider how it has related to the interim; how it related in the concepts held by the Interim Committee — perhaps more safely, to me as I worked with the men of those committees over the last two years; and now the sharp attention in the relationship of freedom and the interim due to the recent action of the Board of Regents concerning the interim.

The explicit intention of the faculty has been, and continues to be, that the interim is an integral part of the school year. The initial suggestion by the Core Curricular Committee for two 14-week semesters to entail the school year was never received favorably. The faculty insisted that a school year was essentially a block of time from September to May. How this block of time was cut up was, and is, dependent on how the faculty thought it could do the best job of education. The first interim committee was therefore established with the charge "to create an interim for ALL faculty and ALL students." Please note that word "all," for the faculty felt so strongly that this new form of education not be construed as an invitation for a vacation that initially everyone was to be required to be present. Further, the faculty said in passing the 4 course - 1 course - 4 course concept that material then being taught should be restructured so that through innovative and imaginative efforts material could be pulled out of a normal semester context and utilized in the interim to provide a different exposure to learning and to teaching.

The first interim committee embraced the basic thrust of the faculty's wishes with great glee: all the members were thankfully quite compatible in their basic approach to higher education. Therefore, we quickly agreed that 1) the interim in no way shall be considered to be less essential than a regular semester, and 2) freedom with responsibility would be the primary louchstone.

Students don't "learn" unless they are motivated, even with grades present. Therefore change the grading system so that teachers, and students would have to rely on motivation and interest rather than the threat of a grade. "H" (honors) or "P" were thus born. Students get up-tight over venturing into strange waters, and teachers are reluctant to fail students as a rule: so drop the F—in fact forget the student ever took the class if he didn't pass it—after all it was his time and loss which is his to account for eventually anyway.

The interim committees (and faculty) have felt that a course given in the interim is an legitimate as any course in other semesters. Thus each department of school has had the option to designate any course as having the additional responsibility of fulfilling either General University or Arts and Sciences requirements. Further, the first committee considered the rule that the P/F option could not be exercized for core courses to be incongruent with freedom and the motivation challenge. This rule also implied that there is an inherent difference between courses taken for these requirements and other similar courses taken by a student, which did not appear at all valid. Therefore all courses with No. 300 - 320 would utilize the (H) and (P) system with no exceptions.

Require all students to take the first interim? "Not on your life," said the committee. At least that was the idea expressed. A student needs only two semesters to be a graduate of PLU (the last two), and no one can force a student to take any given semester, except perhaps his parents. Further, some freshman might do better to use that month to reevaluate the previous semester and to get a start on the next semester, than to take an interim course. So, we obtained the approval for the situation as it now stands: Two interims required for continuing students, one for transfers. Even this rule and the rational for it should be reevaluated at this point.

The plan of action format was developed to broaden the concept of freedom to learn as far as possible; but because it was a non-objective, non-judgmental program, we could not justify grading it at alf. Several students have thankfully made use of this option in the last two years.

The first interim experience was received with general feelings of astisfacuse and, indeed, pleasure by the faculty and students. The second interim again was utilized by the majority of students. There have been problems in several areas of the interim: Registration procedures are being revised to rectify the severe problems that have occured (both faculty and students have been hart), class sizes have been a continuous source of confusion, too wide a range of responsibilities required of a student of confusion, too wide a range of responsibilities required of a student from course to course, off-campus courses have been very difficult to keep in the fabric of the interim. But, no program of any worth is born easily — too many habits, patterns, and biases have to be adjusted for that. That doesn't mean it isn't worth the effort — even when we lone.

One of the greatest sources of the developing imbalance between man's technological and natural environments, is the incongruence between man's rapidly changing technology and his relatively static institutions. We are quick to change our ways of life as technology permits, but we really don't like new forms in our institutions. There has been constant pressure to revert to previous ways, and both interim committees have had various difficulties in keeping both original concepts as true as possible.

Some students and faculty would rather go back to grades: students because they don't like working harder than the next guy and getting the same grade, or having a proficiency in an area and wishing to exploit it; faculty because it solves (or may solve) some pressure problems, and it "solves" motivation problems.

The pressure to take courses that fulfill requirements has not diminished. The core is so marginal in the overall curriculum that such pressure should be decreasing. The interim committees have constantly solicited suggestions for improving the interim so that courses could stand for their inherent worth and interest. Some suggestions have been received to not permit courses to fulfill any requirements, at least in part because of the disappointment in the lack of an exploratory interest on the part of many students. To take a course primarily because it fulfills a requirement if you don't really have to (as a senior may) is not a very good rational for a supposedly intellectually alive and curious individual.

Finally, the recent action by the Board of Regents — the faculty philosophy has been that the interim is an integral part of the year, and that it is the students' loss if he choses not to participate. The recent action in effect reverses this so that now a student apparently saves by not attending. This university, as well as most others, has had the policy of socializing the cost of expensive programs over the entire academic community if such programs have been accepted as beneficial to the community. Thus several departments and programs on this campus which do run high overheads are in effect subsidized by lower overhead departments or schools. The interim has been claimed to be expensive — it may prove to cause an increase in costs; however some expenses have decreased, i.e., class operation in most Natural Science courses. I lastinctively reject usproven opinions and "feelings" as a basis on which to make decisions which over-ride existing policy. It is unfortunate that such hasty action was taken, because of the tremendous ripple effect that action has and will cause. A bit of caution investigation, and consultation, could have revealed a few more reasonable alternatives.

Needless to 1819. I have believed in the interim philosophy and operation up to 1800. I hope both thoulty, and standards will affective to special around the recent action by the Sourd to been the interim as a period to beard, not to Several out's person in ways not available during the rest of the year.

# interim and the pursuit of learning

## mast essuy

"The introduction of the Interim lots the PLU calendar has provided the most viable new mode of education which this institution has ever attempted."

With these words, lest you's easey upon the Infarim began. The concept was new and as is the case with most beginnings, we stressed the Ideal Today, In the light of our second Interim, we believe that a more critical eye must now be brought to bear upon both the effectiveness and the value of the Interim concept.

Due largely to the number of people who have found time to submit their impressions to the Mast for this feature, many of their judgments overlap at times. We are aware of this and have allowed for it in order that the reader may retain the option of choosing to pursue those articles by professors and students whose opinions they may particularly value.

Though we urge you to read as many of the selections as possible, an accurate reflection of our concerns does not necessitate the reading of each article. Many of the important issues are not stated explicitly, but often lie between the lines—couched uneasily within the questions and the doubts.

Many of these questions, as you will see, concern the meaning of freedom within the context of the Interim. What of the Pass-Fail system, for example? It relieves the pressure of grades, to be sure, but not the dedication to excellence—or the urgency of learning. It is a most question whether such a level can be maintained when nobody ever fails.

The Interim is a time in which we may be free to pursue (to employ Dr. Simmonds' word) the frivolous, that is, those things which we wish to pursue out of interest and not out of need. There is a key here, however, which many have missed. The phrase reads: the freedom to pursue—not the freedom to take the class and to subsequently care less because no one fails. It is a problem which speaks poorly of the motivation and maturity of many of the students.

When professors voice criticisms of this nature they are condemned as being out of hand. We accuse them of misunderstanding the nature of freedom in the Interim. Unfortunnately, the point which they are making is quite correct, for excellence is not bound to traditional learning, but to the pursuit of knowledge in any mode.

Out freedom is ried overricably to the responsibility which the pursuit of our "friedom" impress entails—and it says mathing more than that We may still succeed or field in such pursuit that is the price of our freedom.

An Interim which promotes anything less than such a view of responsibility toward the pursuit of learning will engender a meaningless treadom which will assure is of nothing more than the mediacrity such a choice inevisably produces.

Our walk through a china garden

Our walk through a china garden

Out walk through a china garden

Out walk through a china garden

Out I mustgo now

Before I shatter all your crystal flowers
I would have liked to stay

Out I can no lodger pretend

The leaves have notbegun to fell.

LM.

Time flies so slow

the passing lonely hours

in wordless silence kept.

The pesitential clock

ticks metronomic measures

to the rythm of despair

While sand sifts slowly

through the hourglass of time . . .

HAMMERING A SHARP STACATTO

to the music of the mind.

M.B.A.

# the calculated risk

By WILLIAM P. GIDDINGS

The Interim holds the realm of possibilities for which we put up with short semesters. The overriding purpose is to enable dimensions of freedom
not attainable within the structure of a conventional semester. Faculty and students are supposed
to be free from the demand that every course occupy a recognizable place within the larger patterns
of major preparation, supporting courses, or general
university requirements.

The pass-fall grading system is supposed to allow a focus on the sheer jey of learning, so that the manner of presentation and the student's response need not be geared primarily toward evaluation. In my own case the interim has allowed me to try to share with students my passion for church music, instead of working only at my profession of chemistry.

The intention of a single course lead for faculty member and student was to overcome the tyramy of the clock; to permit whatever schedule of time and place was appropriate to the purpose at hand. Several of my Interim students did tell me that they appreciated having enough time to practice on their own to make really satisfying progress.

Freedom, of course, can never be absolute; the greater the measure of freedom, the greater the responsibility to avoid infringing upon freedom of other types and of other people. For example, we have permitted the freedom of using Interim courses to meet general university requirements. The result appears to have been a severe limitation on the freedom of each student to take what he wants; as the Provost reported in the February 10 Mooring Mast, a number of students this year had to settle for their second or third choices.

The data available to me suggest that the enrollment pressure became too great to meet, chiefly in those courses meeting general university requirements localized in a single department. By contrast, courses centering on environmental problems drew poorly as first choices, despite their presumed relevance to current problems. Most courses ended up with enough students to justify offering them, but at the price of not being the first choice of a mimber of their students.

I'me coshing inconsistent about the perposes of the interim and the perposes of armeral university requirements. This year I that many students deliberately and unnecessarily robbed themselves of their own freedom to choose a course just for the sake of interest. I conclude that to preserve the larger freedom which is the whole reason for the interim, we will be forced to restrict in some way the freedom to concentrate on general university requirements 44 that time. My own preference would be to other new of interim courses to meet general university requirements only after the two required interims have been taken,

(t in of comme very possible for a foculty member or student to abuse his freedom by failing to use the interior productively. There is the obvious possibility that a modure may gave a comme credit with appreciably from work these darking a semiester. There is the risk than an instructor may set come to gripe successfully with healty defined comme content and espective. Making a cotal commitment to a study source design this module operation to the study this module operation to the study of the cotal commitment to a study source design this module.

The concept of freedom presupposes that students generally can work productively when considerable interdependence and that faculty members generally have more to offer than imitations of their own educational experiences. It would be surprising bedied if these presuppositions were fully use in every instance.

The Interim then is a calculated risk, an exercise in responsible use of freedom. We will continue to have Interims only if we consider them as valuable as other courses. We will accept the risk only if we believe that the expected gains outweigh the potential costs, and act accordingly in designing and selecting Interim courses.

Next year will be critical in assessing the future of the +1-4 calendar. I am convinced that we can make whatever adjustments are necessary to utilize our freedom wisely, and that the Interim is worth the risk.

## reticence ...and ...

There has been a biding of time.

A long shadowed
Waters for the suntice
Sawing of callburied feet
Teating at a muddy mind
Time
called lesure.

And for all
It at ruming free...
Musty hair, shoodly leads,
glazed ever
reflecting
Frigid miles of iron ralls
The nakedness of rented rooms
24 hour best friends,
1 find it ve burnmed
more questions
then entwers

So I'll wander home. Me and My Foreign a floance.

# the search for serenity

By KATE MANCEP

The standard who wrote this poem (above) had 3 became in which in develop his foreign reticence, but three enoughs abroad would be eafficient for the curious southern to acquire not only reticines. But a knowledge of a foreign culture and language, a myriad of experiences which would open his mind and increase his windown, and the apportunity in became eventred in the lives of porcess and actions achine out.

The variety of foreign work, travel and study possibilities spars the interests and needs of virtually every individual. For the working student, there are several organizations offering job placement services, which would guarantee the participant a position before heaving the United States.

Supports who have until these services in the past have found the observations. We shall be furnity burnative. We shall trips and the final free time, when which ere are able to travel, tend to directly the cumulant, but provide a broader popularity on the hast country.

The legendary "troud tour," which completed the education of the westery during the lang 19th and early 20th century, and caused the death of such acceptes as Lefend Stanford Ir. (he died of typhus), has become safer, and also within the reach of many persuasive stundents.

White students are till drawe orthogity in Europe, universities and organization have opened Arriva, (Adlo Armerica, the Orient and the Woddle E are to adventure some of the comforts and opened to those of Western technology, The cost of towns (generally three to six weaks) beging about \$700, unit

## england: stage right

By JANET YEAGER

The Interior tour to England, sponsored by the England department, tank the distinction of benig the smallest case group from PUU, with only the incoderce The coarse, led by the Morsels, invalved a study of suitish Theater. Altogether, we saw 66 plays, including Mandel and Twelfth Night Mitthe Coler, Flames on the Reaf, Promises, Promises and a munical based on Chaucer's Canterbury Takes.

We were able to see the London Federal Baties, production of Strephia Beausy." and hear a concern by the Royal Philharmonic Orchitum. Most of the performance worn in the evenings, which left the Gays free for visiting rouse-une, galleries and other places of interest, shopping and explanate

Our first week was spond to travelling in places comber of Leaders in a colorious with a driver guide. These places included first-horden away, Carbed, Windoor, Can. State Pages, where Thoras Grey wrote his factom "Elagy Written in a Courty Churchyard." Commbury affered a most moving alght. The pilgrim stopp in the cathedral which have been were late waves over the centuries by the knees of millions of pilgrims, a Booket.

For the remainder of our stoy, the London subes were the main method of tre reportation. We also did a great deal of walking, the best way in which to see the elly as it ready to, we all fuend lond on to be as easy place in which to cross pround, with the complete tube network, and a system of red double-decker bases above ground.

Arong the mustums and Planes which we visited, one which elood put was the British Museum, a vast building which houses most notably the Eight Marties, the Boseca Stope, the Positinal Vasc. and a worldwide collection of manuscripts during from the sertiest writings of man.

We also had the opportunity to go to the feature borner of several liverary greats, which have been converted into museums, including those of fath Kento, Statute) Johnson and Charles Dickent, Nourby the Dickens home was the old Curturity Shop of which he made was in his writing

One afterment we were able to age this Pacific and 10 observe a special of the Pocial of Commun. I be must notable thing about that particular resistance was the obvious absence of some members.

No visities to English denied enclose the public takey price auring of the best meals 10 be found and are a somable priced. And they also offer an insight into the life-right of many people. To the English, the public and only a bor, be a community center where one can gather for a pixtle of tanta, or conversation.

The sames and tight over the coors of the public date back to the time who each of the population was illiterate. The figure public on the sign indicated abrumen of the business Head," "The White Horse," und the "Black Swan" (Otherwise known as the "Dirty Duck") came into bring.

Even in England there is a slight language barrier: for example, there an elevator is called a "lift," the subway is "the tube," a restroom is a "convenience," a truck is called a "lorry," and gasoline is "petrol." The name Gough is pronounced "goff," Beauchamp is "Beecham." A shilling is nicknamed "bob," a pound is also called a "quid," and a permy is a "copper." There is no such piece of money as a guines, but everyone understands that it equals 21 shillings, or one more than is in a pound.

During our stay we came to have a real feeling for the country, its people, way of life and history. And we are grateful to the interim program for providing the opportunity.

#### BEYOND

See the fleeting second level go swiftly by The postroling out has a rate to roll.

The boots who saok their formule.

Washing the chore as a cat her killens
The waves whisper a secret which

Only you behold-a forry wil find her way to your eyes.

Elsma to the wind and wait for the call to Reach you. The echa of my life and the Oreans that are call to the breezes.

# foreign study and the intense encounter

By GEORGE ARBAUGH

Study obtain in ecorate new, but two) rets on the +1-1 extender bove annuary at the each of the extender that the participated in two PLU constants abroad (with Dr. Hinter to Greece and Half to 1970 and with Dr. Schmackenburg to Spain this year), I now find myself valled upon the reflect a blooming nature of such projects.

First one should recognize that because of the calendars on which most schools operate, study tours in January are a hit extraordinary. In part for reasons of weather summer travel appeals to many, and for a fortunate few, an entire sementer or year away appears more adequate to the task. In fact a brief mid-year program has some important advantages of as own. It allows one to travel at a time when costs are low, good facilities and services are more readily available, and the summertime crowding has eased off. It should come as no surprise that when traveling with a group in winter, one is usually provided with more than the usual student accompdation and at far less money than one would otherwise have to pay. Even the guides tend to be more patient and of better quality than in the peak season.

numbly, if one must choose between winter and summer in southern flumpe, it is arguable that January weather is preferable for touring to that of July.

Beyond such compo risons. a mid-MINIOT DELL'AND AND AND TOLING for the student Pour most it comes at the right psychological time-Fur many it makes an education al equinting again train critica al loss a practical possibiley. To LOUNT & minth array from Carp on to cam thing, to manage a semeints, a yout or even a Summer away (with credit to be egecored by the home institution somethe nut expured ) is quite enorther Summer etudy abiand attracts munty tell academic opportuntties ore limited, good jobs victually unavailable, and-most serious-such programs usually preclude the possibility of profitable summer enployment at home.

What exactly is the raise of corely formign study emproy ? The bost actives to that U all depends on neurly everthing (The high cost to Americans is at least an edvanishe to a country like Spain without derives more of the funds for foreign exchange from tourner then from boy other source. Interestingly cough it is estimated that one million American visitors anmusily spend to much chart on mine million from France | Certainly the value of sereign ducy is eletermined in large encaute by the type of program one exicore. " have tary from those to which a h American institution offers an ensentially American program tought by American Institution to Amerion students-in a foreign cityto these to which an American padeat immissions on hits own for stade in a Norigo university. There of fered by PLU (st food them to Which I have participated! ie minewhere beengen lived cutremes. The subject matter is provided to some part of the country HE culture to be winked, and ilthough one travels in the cotopany

of friends from burto one to its ounstreet commer with local people in on atmosphere of largely individual study, proved, and discussion the benefit a participant derives from his experience depends more on his individual industry than it would in a conventional classroom course. Nevertheless, a core of suggested or required reading, a hit of writing prior to departure, and lecture and discussions both before departure and enroute, all Atomre a focust to the 6000y out the channel to from the more cannal and impressionistic, and unally less educational tourist's jount.

There is a long tradition which recognizes in foreign travel an important ingredient in good liberal education. Nothing short of firsthand contact with different styles of life can so impress on one the polar facts of man's common humanity and cultural diversity. Even a few weeks in Spain this Jaouary were quite sufficient to provide a lasting impression of both the richness of Spanish culture and its singlemindedness in the pursuit of ideals, some of which are startlingly alien to most Americans. The counter-clockwise swing of this year's Iberian study group through southern and eastern Spain, through ancient Toledo and modern Madrid, Roman Merida and Moorish Granoda, allowing visits to the vites of Phonecian and Gavek colonies, to Roman aquaducts, Visigothic fortresses and Moorish palaces impressed most of us I believe with the richness and diversity of the ingredients in Spanish culture. Nothing more than an (informed) glance at the street

names of modern Spanish cities a required to provide an indelible impression of the pathetic course of recent political events in that country. Modern Spain is a curious and paradoxical, appealing and appalling nation—historically influendal, religiously idiosyncratic, and philosophically curious. A study of it in depth is no doubt best, but a brief and intensive exposure can also be rewarding and, at the very least, provocative.

Last year's warten jarren to the Greek homeland of ancient phithroughy said screece tres in the own unique way correlatly so less walmilde then this year's trap to Special The tour began and ended in ancleat Roman and in vurdicya) and repainantes Italian cities. Ross) and Pompell, Apples and Plearence respectively. Its focus was liour ever on classical Greek civilization with special emphasis on rocial life in the appearst city-states as re-Reded is Great there's of ours and political Life. By way of but. TOOK AND LINE OF LIVE OF INTE five (approximately the same also as this year) circled the southern endul the Italian boot, Sielly, and the eastern Greek mainland, with ing each ancions Greek sitles as Paestum and Toronto in 10ty, Seguste, Salinunte, Agrigento and Syraction by Blethy, and Athens and Curlette in what is new toodern Green The territory covered in three worths was to put it comesvalively, souther, but author to many tourns suskers a common thense for mady served as untily what willy otherwise bove been n bewildering army of sights, facts and Impressions.

To the criticism which one occusionally hears that so few weeks is too little time for so much, I can only respond that it is indefinitely superior to no time at all, by alipping in some sessions on campus before Christmas and by encouraging participants to read and formulate their thoughts over the holidays, one can prepare them reasonably well for the rush of impressions to come. Perhaps some thing can be said for restricting the scope of their brief study perinds abroad and for packing in a bit more formal study prior to departure. I am inclined to thick that once one has gone to the expense and bother to get to a place like Spain or Greece, one pught to err on the side of staying long and seeing much- albeit less intensively-rather than spending less time there studying fewer things in greater depth. In the past two years, most student reactions 1 have have heard have concurred with that opinion, but the question further e

I suspect there is as way of (why within the the elitable who wents objective evidence to the other that use can accomplish Manificantly more studying obroad nathor than here Certainly und cun bearn the History of philosophy sit bits expense from books and at home. Yet, our king consideration or the multitude of little and sometimes tangential lessons learned and of the plottities enjoyed the hum beards fourt to sales tours ישודיו אם בו זמב המתר ששמח ושוכוי octual attenuous. The amples of anclent Cirecce do meun more to find after a waser to Address or Sellnunte as do the Moors or even Fordinand and Isabella after Granada. There are, I believe, few students who find such study on the spot tedious. Ironically, however, there are a few who, because they enjoy themselves in such a course with a minimum of conventional classroom routine, lest personally guilty or are critical of seachers and fellows, and who conclude that they must not really be learning much. That a PLU student need at the present time only pass interim courses and need not worry about grades no doubts augments this occasionally occuring state of unconfocus. In any event, the merits and problems of the pass-fail system are another issue from those of study abruad and need not be entered into here.

The experiences of the traveler can never be a substitute for a more bookish kind of study, and especially so when so much tourist travel is little more than costly but aimless wandering. It betrays to ask-as few do-whether us interim abroad is really the equivalent of a classroom course on campus. These elements are complementary and travel abroad need. not be at the expense of much if any conventional fearning experience. In an age when routine pedagngy is so severely (and unfairly) criticized, when rich and relevant experiences are valued over more possession of factual material, and when men so need both the understanding of other cultures and the perspective of those others as their own, then an all-too-brief interim abroad can have a great deal

# life, freedom and the interim

OR HOW TO FRUSTRATE A

By KENT SIMMONDS

The loteries is but one god of the total academic structure. The +14 design olius to integrate troalleforms meterials which are onsential to an adequate proportetion for a chosen vocation as well as necessary citizenship (and churchmanship, If there is a difference). According to the projected scheme, concentration on fewer courses, emphasizing greater selfrallance and more intensive the stig thion of Intercelated phonowear, will more readly and surely produce a p2/300 with qualifies appropriate of the protect needs of our world. A person is induced to view the phenomena of a disciplina in a more cohesive fashion. He practices integrating data which is personally more interesting.

The result is a person who more thoroughly understands who and what kind of person he is us relation to a number of different disciplines, and hence, is able to alternative life-styles. Concentration on a single area (a major) then provides more intensive exposure to a particular the style (premountly one's own) and the person consequently experiences himself both to relation to the breacht of a particular life-style.

The Interim program is designed to chief there to this peneral pattern. According to the 1970 Canica "The interim provides fredom for the student. "In proceeding for the laculty." In proceeding for the laculty. "In program, one evidet approximate the interim provide freedom from? What does the interim provide freedom for?

I is my uplation, it is not wise for an Interior experience to provide freedom from experience to provide freedom from any of the nuclear while the general occulumic penarum. Emphasis upon act cells upone, greater integration of individually relevant data, not substitute expensive to the type, eve all departs to the type, eve all de-

ments necessary to any significant educational experience. These are things the Interim should provide freedom toward.

The one thing of importance to the general curricular structure which is left out of the Interim is the emphasis upon traditional materials. The Interim is to provide the student with freedom from concern with what is professionally, vocationally, even religiously and politically useful. Indeed, the Interim should provide the student with an experience which is free from even personal utility. The Interim is the one opportunity a student has to be frivolous. Of course, I do not mean to suggest that frivolity is not personally a very useful thing. Life consists of a number of such paradoxes (He who finds his life shall lose it, etc.). It is precisely this fredom from the useful that constitutes what the Interim should provide freedom for. In the free investigation of what is unnecessary, the person finds occasion to be creative, relaxed, reflective by nature and not by habit or compulsion, interested or uninterested as the subject matter entices and not as the needs of parents, teachers, or self might

It does not follow from this that students should be free to establish their own requirements for the Interim courses in which they elect to participate. Nor does this mean that discipline is not required for a valuable Interim experience. It does follow from this that no one should engage in the Interim in anything which is professionally, vocationally, or academically important to the person.

It is important to taken forces that the interim on this enemal is not do since to provide what the Pake Fall eyetem in design of to provide The Pace Fail option during the regular enemater is deviated to encourage students to investigate more thoroughly ereas of special leterest in the student, but quickly of his supported competence. The Interim program is decikined to encourage students to investigate areas even quickly of

one's general overest. let alone his special interest.

A is true that the basis seres a unique opportunity for many students to pursue their primary interests more intensively than the general academic program allows. However, I do not believe that the Interim should be designed to encourage that. Such opportunity should be a part of the regular semester program. The fact that the Institution does not have sufficient funds (at least) to provide significant opportunity for indepenent and seminar study does not alter the fact that opportunity for freedom from traditional investigation is an indispensable ingredient. of an academic program.

How, then, ought the Interim to

provide this freedom from traditional materials taught in more or less traditional fashion? A faculty member is but a more professional student. He requires freedom from his vocation just as surely as the student requires freedom from his. The faculty member should be encouraged to pursue in whatever manner he chooses whatever concern he chooses, so long as it rumains outside of his professional competence Of course, this does not mean that he leaves behind his more or less welldeveloped tools and concerns. It does mean, however, that he brings them to the new concern in a new way. This provides him with valuable incentive to remain himself personally alive. This is turn will promote greater life in the total academic program.

I want to turn more specifically to my own Interim experiences. I have a special professional and personal interest in Plato. In my jargon that translates into the belief that intensive investigation into Plato provides me with understanding of what it means to be human so that I am anabled to become a better person (I am trying to remain heief). It seemed naturally appropriate for me to provide courses in Platonic philosophy for the Interim, I selected untraditionat themes and schemes and taught the first Interim with 20 students and the second with 150 students.

Although there are considerable im experience and the second-important difference at that, the principal pedagogical effect remains constant. Of course, student response in the first Interim was considerably better than in the second. Of course, I taught better with 20 students than with 150. Of course, it was more enjoyable for everyone the first time. Of course, many things! However, what is really important: few persons experienced freedom - creative, healthy, relaxing, enervating understanding of oneself as a person-in either Interim. This had relatively little to do with the

quality of my teaching or the character of my person. It had to do with the lact that ou one was toterested in relaxing the demands of the profession, the vocation, the academic program, or their own

I to covince to every my tree the lateries was and designed primarily to provide students with an opportunity to satisfy general university requirements (although many, including myself, complain that that is after to fine bocome! When at just techird of the system that to take an leasting for the Dirpum of fulfilling a general university requirement (one-fifth of those in philosophy), it is equally obvious that something is fundamentally unsound about either the Interim offerings or the Interim program of the Interim students or # U of them

So long as we spend on emphastates the weeky, we will fall to provide what is routly of use, a creatively free approach to the איסרול עווע ווה חון איבות מו נחלישונים, 90 Jung Bu WK Inbias on combo states the useful, we will tall to fully approudate what is traily of une, as understanding of our own unfellered by traditional manufale traditionally investigated. The world demands creativeness and freedom fromness, I am thoroughby convinced that freedom is not avuilable without traditional discipline, that understanding our traditions and the tools necessary for apperpriating them are absolutely indispensable to cree treely from persons. However, I believe it may also require redical openness to the world itheir.

To with to family these claims and this porticular infrepretation of the Lawring Program would require many more pages than are available here, I am not convinced of its mundates; but nonetheless, I should like to argue for it and all the cultural and educational principles it involves. Perhaps this presenting of the thesis may serve as a beginning.

## a matter of course

SY PAUL REIGSTAD

I was a member of the faculty the Curriculum Committee which two years ago recummended the adoption of the 4-1-4 plan and the present general university requirements. After two years of experience with the program, I am certain we made a weig pushtion to adopting it.

As I remember our discussions of the purposes of the Interimand unfortunately, each of us usually remembers what he wants to remember - we emphasized the freedom of teacher and student to develop interests which lay outside the boundaries of required courses and traditional experiences. We emphasized the fresh and the new and said we ought to encourage the sert of ore-time liting without meed not be justified in terms of complementing a specific langrange program. We employ the the made terror terrores to topicoses practically, and though we were nal b a innovent by to speet relief I mon oil drudgery, we ill lines that tenting, grading, and the other besiminim se billow poolinerate in forms of instended plumium and Do?Heimstien.

I still think the idea behind the Interim is great, and I believe we have been successful in bringing it into practice. What problems exist—and there are some amonging ones—are of a mechanical nature. Foresight and increased cooperation (con bath books) and satisfue can eliminate them. In fact, several changes already agreed upon—for example, to complete Interim registration before Christmas vacation—will lessen the pressure that has made Interies seem confusing for some of us.

have disappointed me. What many of us had expected would be a free and uncommitted opportunity for all students has turned out instead to be for some a time for getting requirements "out of the way." (The very phrase has an unpleasant ring.) We say we cannot afford the luxury of taking a course just for the fun of it, and sometimes we even cite the evidence of increased professional or major requirements forced upon us by the 4-1-4 structure. The whole point of the Interim is threatened, I think, when we insist it must be used to fulfill requirements.

The order Hisages intment is that he advence of conventional grading and structures, sugge puriful-paots have decided that interior courses are not courses at all has simply cover a speciances which can be phaged only an occasion—during free purieds (if there are any) between six tips and codes breaks.

IF an Levin course it store to be successful it is because both sudes and teacher accept respon shilly by making it work i to distarted by the sumber of she dead who see to tender for the full company because they believe there can exhaust the possibilities of book of them and still have lime left over for Money. What the stodest bas exhibited in must berotorio to the minimal requirecome imposed by the instructor. What he has not exhausted is the opportunity to go far enough beyoud the basic demands of the syllabus to see the unlimited posof littles for discovery.

But to spite of these disappointpreats, my enthusia on for Intering is high, and I look forward to Jonanery, 1872.

# surrogate supplement

By SUSAN PETERSON

For all too many students curriculum is a high pruteia supplement which is cut into small cubes and used to fill in mystical fed troughs in preprescribed classroom. One walks into special 'educational cubicals" and waits for some enterprising teacher to shovel out the measured amount which has been computer calculated for highest rate of gain. Unfortunately, education is not directly proportional to the poundage of fatty tissue around the brain. Neither is it proportional to the length of a transcript, number of majors, the perverbial GPA, a parchment facaimile of the traditional sheepskin or 700 plus scores on the Graduate Record Exam. All of these are nothing more than the result of ingestible curriculum.

The time has arisen for the fatted calf to exercise off his lard in lieu of being slaughtered. If "plastics, my young man, plastics" is your ultimate. aim, welcome to the cutting chute, but be well aware that there is something more out there. There is a whole world of learning beyond that kind of education. When those forward - thinking individuals who set up the PLU interies wrote out its objectives they had this very "more" in mind. They have provided something beyond a mute path to the packing house for those enterprising students who view themselves as more than sacrificial cows of the aystem.

Although I heultate to second the motion of any bona fide professional educator, the emphasis which Popham places upon behavior as the only valid indicator of learning is perhaps justifiable. In fact if behavior is the test, I would even go so far as to apply the "principle of appropriate practice." If one's education yields as its indicator resultant behavior then the process of education must include practicing that behavior. True education yields a person who not only analyzes but also integrates the information, feelings and perceptions of self and environment. As E.M. Forrester puts it, "Connect, only connect." Innovation and integration are the component results of an effective educational endeavor.

Imovation and integration, then, must be the activity of a true student. Independent endeavor of any sort is the most valid setting for these behavorial gems. How can one do more than elaborate on someone sise's design in a spoon-fed curriculum? To passively accept only those classes listed in the catlague or complete only the required assignments is worse than vegetating. It is to commit the static sin of ommission,

Fortunately, the planners of the PLU leterim seem. to realize this and have provided hope for those of us interested in learning outside a bread and butter education. They have included a provision which allows the individual student to create his own class his own curriculum. Lamentabley, many have not availed themselves of this exercise in innovation; they merely line up with their polished funnels in their respective ears, waiting for sorgum pollets to be poured into their bollow heads. Why, oh, why is independent endeavor so althorent?? Certainly the mechanics of registering an independent project cannot be the sturnbling block, not with any professor on campus holding an empty independent study list begging for takers, not with community groups soliciting willing volunteers, not with student tour rates at an all time low, With the opportunity to expand creative vision so near at hand, any student who retires home to loaf in January or takes a class that he really does not want just because everything else is closed sught to be shot.

It is the rare priviledge, indeed the duty, of each and every student-scholar on this campus to use his ingenuity to create for himself and perhaps for some of his fellows a unique program of study at least one out of the four January interims that he attends at this institution. If he won't or can't do this, he limits himself unmercifully. What will he do when he must eventually integrate the "education of experience" which comes outside any classroom and outside the boundaries of any educational institution? By far would it be better if he had never learned to read at all. The fatted calf, not the prodigical son, will be slaughtered before the feasting even begins.

# biome, biome on the range

By NORM CARLSON

Have you over been locked in a refrigorated storage room full of vertebrate skuffs?

That was true of the state up count experiences I had during the Bigley Justim cours milled, The Oceant Elizane,

Our caravan, which consisted of three campers and a Volkswagen, departed the waterlogged PLU campus January 6; destinatin; sunsnaked southern Arizona.

First on the lunerary was a trip to the University of California at Berkeley. An introductory fecture on desert life was presented by noted ecologist and alumnus, Or. Ouvid Wold Emost three was carry for a quiet was of the man Alvo Mangrati of Vertebrate 200long our midd one out of all concerned with counting heads as the group field out of the shull Surge (1999). Needless to Any, 1 emerged from the darkened deep freeze fifteen minutes later.

We were do the road again for two days after Berkeley. As much the V W was me behind the pack. It's true, firme German Lawrence are gotiess on the hills.

Joshua Tree National Monument was our home the fourth night out. As my rolled in my own gradual with one of the most beautiful sunsets I've ever seen. A common problem had also been the members of our group. The entripore were equipped with all the comforts of home allegal for showers. We were all getting grubby. The need for a good steaning bucame imperative. Ob well, your more day wouldn't cause any difference.

Nessled in the dust board of southern Arizona complete with pictureesque surroundings of creosote and saguaro cactus was our destination: Why?, Aroma. This building was covered related when I community of 30 precied up with

open arms. At last, we could settle down and pursue our scientific endeavors. The agenda was filled with activity. New kinds of plants were waiting to be discovered and Trantulas, black widow spiders, scorpions and snakes were there for the digging.

I was assigned to observe mammal activity. Unfortunately, this chore involved getting up when the mammals got up. Wandering alone from sunset to sun-up in the middle of the desert plays tricks on the active imagination. Getting lost in the desert at night leaves you at the mercy of your imagination. After regaining my composure, I saw what the desert really represented. Other than an occasional howling coyote and a distant galloping horse, the desert at night was the epitome of serenity.

My neck at Way? and be no reenthreed and cherished as a highpoint is my tite I so were the other members of the group dom my sent imeous. The trip did more than gather edontitle information. at the debut hime, it brought twenty people together and created gaillificant set of travelal laction a field of Biology.

Oh, by the was, we solved par

# shrines and signs and sealing wax

By JOY PETERSON

From Galilee to Gaza, the land of largel is forever evoking Biblical scenes. Scenes of divine revelation, a home for the historically conscious chosen people, backgrounds of the marvels recorded. in the Bible.

I was't have you with the 46tails of any sent of religious appocalypse that I experienced while tribing ectules the Judge thouse tains; I didn't bave me I didn't feel Boy closer to God; what I fell was two drops chider to understanding.

A very small country, largel to a relatively stopic place 1989) your bearings. "Up to Jerusalem, "there to the Jordan," "Active the Vale of Kigras" ... experiescing the terrain is like milling on your glasses-it leads to dartly and vividness to Billio reading.

ferred, and shore steps to Calvo מחל אוליבונה וחולם וחפ שיותר של what is meone to be bumbn in ert tutes of religious and value The tombe of the ancient Enynthum showed how concerned they were with reproducing " this ille" in the next one. Obsessed with the Idea of the hotisees and othermen of God, Judale tradition has witnessed no such love of this life nor has It lidulged in massive monument constructions the burning bust in the chorat the Jess man to plac-Leg a Dinger on Ellin.

Christians, on the other band, have built shrine upon whete Jums spenic of the conting "days of the

Messiah." Christians speak of the man, Perhaps it is because Jesus is so intensely human that Christians feel this need to "grasp," But imagine the disappointment upon going to Nazareth to see Mary's Well entering a concrete church, and being told that if you put your ear to the grate in the floor under the altar, you might hear a trickle, which, of course, indicates for sure that this is the place.

It would be an oversimplification to say that one great people worships life, one worships God, and one worshivs shrines, but if one were to observe the outward signs left by these religions, that conclusion might well be drawn.

As an educationa experience, Interim-Israel couldn't have been better. We read about Israel. We saw Israel, Qumran, the Dead Sea. Scrolls, Yad Vashers, Hebrew University, Megiddo, Capernaum, Maeads as well as the pyramids and Corinth. Then Dr. Govig led us down the path of constructive discursion, resulting in some profoundly abstract and concrete conclu-

It was the unseen things, the non-tourist things felt and heard, that made this an experience to remember. The Jewish sabbath, a Moslem boy singing the Koran, the community feeling in a kibbutz, the undertone of hostitlity between Palestinian and Jew, the smell of oppression, the pride in country. and the unity of purpose and poople. Israel-it is difficult to put into words the impact.

# comb and tapestry tours

BY HELEN ELATI

) was one of 11 PLU students threat into Speth's most Criving COPyrorise -- tourism.

Our group was fortimate Lx that wond, t grands obsued at Land the more testimes "somb and capestry' ware that much of Europe link to offer.

The manuments and understand are very much a part of the history and culture of Spalm, had so is the man who carries the BANbage out of the city goah day an his ax-cart or the blind man who wells rathe dichecs on the street

I considered myself, as part of the tourist industry, a contributor to the tourist-oriented way of Bie in modern State, Stores, restror agile, and house sales to the foreign traveler. I was astounded to discover that even the church has had to make some #djustments. The cathedrale are to capacito that our Broup wan hardly noticed -rub oradi elegas was out guurne ing the week.

to Valencia, bowever, we mileted a charch while a service was in progress. This observation reads no difference to the pildt, who less best of cer. Stand to the contra alter and Dozno to deposite one of the married all the top. 1 wanter with the reaction would be if a fereign group marched to On from of Eastword during Student Congression to emploin the CLARY WHEN OF LIN CHAPTED to & DEED tor for university functions. I doubt that they would be ignorated as we appeared to be in that amail cha cele

The rural artis of Spain are just to accustomed to foreign travelers, and the bases on the carrow roads go lactorly unnoticed. Our Courtary emphasized the beger cities and took us to a loop from Madrid to the MAT of Challe is the south, a round the southern tip and along the cautern coast to Barcolone, where we remind to our original polos of departure. The less populated farming areas consected spain polots of Interest. The parase "cantion in Spain" because dayingt bessed on the out the the country lide datted with these

# Under the Grandstand

By CHUCK NORDQUIST

As I watched an elated Lyle McIntosh, captain of the Lute Basketball team, cut one of the nets after the Willamette game, I couldn't help but think back to the miserable 2-7 record the Lutes had compiled after the first nine games. So what is a team that started out like that doing cutting down the nets in Olson Auditorium? Isn't that a luxury afforded to wineses only?

Well, the Lutes were winners alright. Just ask the near capacity crowd that turned out for the conference finale. With a little bit of help from their friends (two upset victories by Linfield over Willamette and L & C), and two tremendous team efforts, the Lutes were able to half down the conference crown.

What was the special ingredient that helped the team record 12 victories in their last 15 games? Balance is a big factor, and learning to work together as a team helped. The tute roster, filled with a large number of transfer students, displayed a great deal of talent. But basket-ball is a team effort, and until a group of men learns to work together they remain a group of men, and not a team.

I'm sure that Coach Lundgaard, and the team would give anything to replay the first part of the season. They might be given that chance if they receive the NAIA district hid. Given that bid, the team would play the winner of the Evergreen Conference (more than likely Central) in a best of three game series to determine who gets a shot at the nationals. As it stands now, by virtue of a two point victory over Western Washington, Central is in the drivers test in that conference. After losing twice to Central early in the season, the Lutes would love to be given the chance to show them what they can do now.

There is another baskethall beam on campus that is doing well also. This would be the female Lutes. Ever since the return of Jody Schwich to the linesip (she was out earlier with an injury) the Lady-Lutes have been unstoppable. They set a school record not to long ago for the most points in a game. St. Martins was the foo, losing 35-14.

There is some talk about this team being the best in the state. They will be given their chance to prove that next weekend at the Northwest Girl's Baskethall Tourney in Pullman.

Last Wegkend, at the Northwest Conference Wrestling Meet held to Welte Walle, the Late grapplers surped in fine performances in Emlabteg second to a strong Positic team.

Pf. I touk two weight classes outright. In the 100 pound cia as Gary Borner plants Reid Nati, of Packlic, is the around period of their match to the ser pound chain Bab Herry) decisioned Curin Sales, also of Packlic, 4.2

# To Open March 4

ones will invade the PLU Campus to view the Children's Theatre second production of the year, "The Emperor's New Clothes," beginning March 4.

The play is based on Hans Chrustian Anderson's tale of the entgeror who thought of nothing but fine clothes. He was not aware that Han, the Minister of the Royal Robes, was cheating his weavers and keeping gold and lewels to himself. Two adventurers appear on the scene and the result of their visit is the salvation of the empress and the weavers and the hanishment of the wicked Minister of the Royal Robes.

The show is again directed by Mr. Eric Nordholm, who originated Children's Theatre at PLU.

Three performances will be open to the public: March 6 at 2:30 p.m. and March 13 at 2:30 and 8 p.m. Tickets will be on sale at the Eastvold box office an hour before curtain time.

## Children's Theatre Student Volunteers Commended

In keeping with this year's theme of commitment, PLU students extend their time and energy to the surrounding community. Not the least of these services are projects like the Painting Party that Mr. Richard Jobat organized at the new Court "C" Drop-in Center.

Mr. Jobst, together with Jenny Pierce, Karen Svendsen, Janet Kucke, Joe Doupe, Sue Peterson, and Miriam Leppaluoto, spent 5-6 hours Feb. 10, converting an old antique shop in the Court "C" mall into a usable ping-pong room for the drop-in center.

like the student atabar, the materials were all donated. The pingpoug table, for exultable was a gift from Model Lumber Company,

The new penter, which has a sitting room with a plane ( and eq. orange parachulo Al a colling drape } li addition () the recreption recon, welcomes anyone, but salers to those who have beed recently dismissed from the Voterana' Mosgiter or Western Store Hospital. Soch people all too ofton have no place to go upon their dismissal and the center is an attempt to be a first coates with outside world.

## CAN YOU BE INDIFFERENT?

The baby seal in the photo was one of 50,000 killed in the Gulf of St. Lawrence, one of over half a million seals clubbed, speared, shot, gaffed during the 1970 Canadian-Norwegian slaughter in the Atlantic

Don't believe furriers who would persuade you that Friends of Animals has been "misleading" you, that any sleughter anywhere is done for the benefit of the seals.

I, Alice Herrington, Instity that on March 21, 1970-the nd stay of the Carcadian seas same brutal massacre against which Friends of Animals, of which I am president, has been profesting for years.

As the bubble-domeid helicopter flew low over the first day's kill, I saw mother seals nuzzling the skinless corpses of their babies. Standing ten feet away from the killers on the ice floes, twenty miles out in the Guit, I saw baby seals clubbed twice, raise their heads as they were sliced open. Other babies were battered as many as fourteen times while the mothers watched in terror and stress.

If You Are One Who Cannot Be indifferent to the Suffering.

#### YOU CAN HELP

First -by refusing to garb yourself in the agony of another. by refusing to buy the skins of wildlife.

Second - by causing this advertisement to be inserted in your local newspaper. (A mut will be sent upon your request to Friends of Animals. See coupon.)

Third-by sending a tax-deductible contribution to Friends of Animals, Inc., a non-profit organization that intends to pound on the world's conscience until sentient men and women everywhere are made awars of the unnecessary cruelly and destruction being inflicted upon animals. Your contribution will be used to plead for those creatures who cannot speak for themselves but who dumbly improve your pity.
