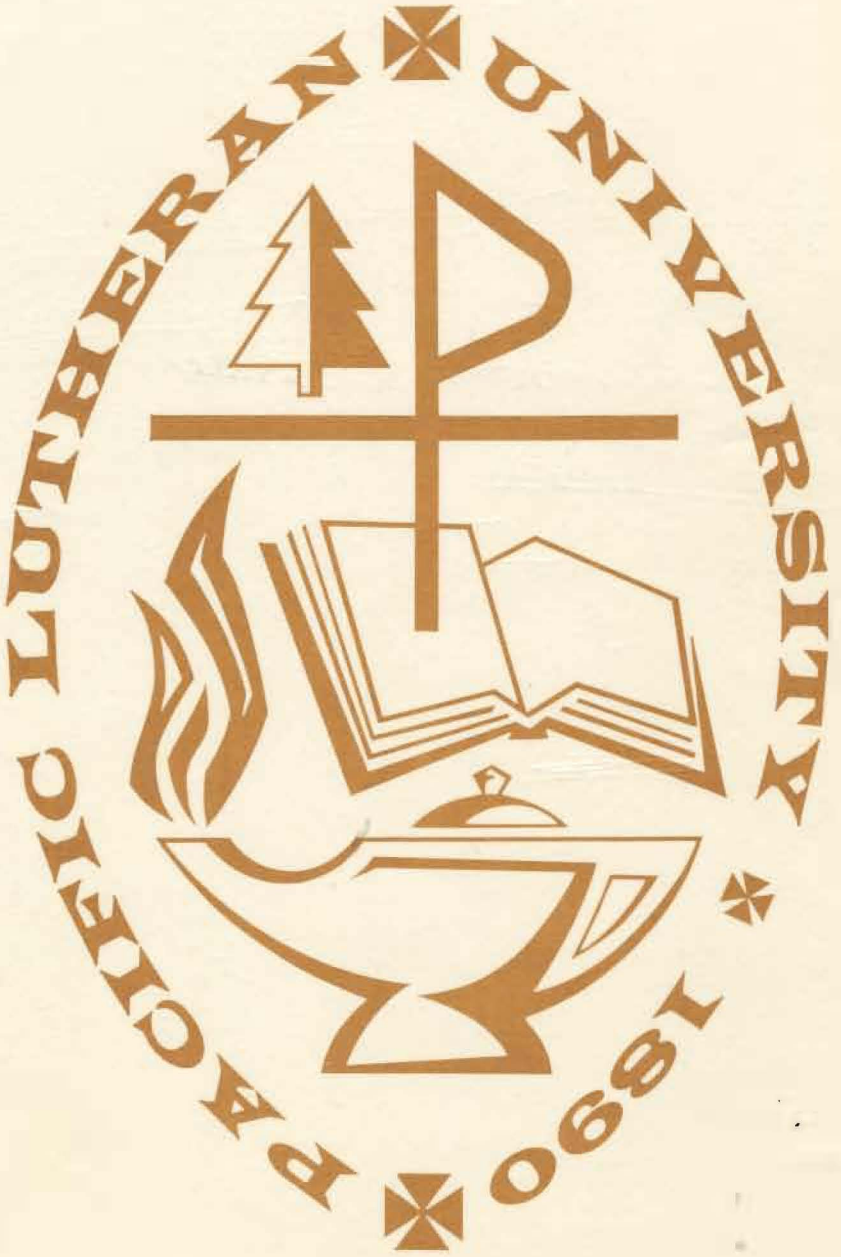
PACIFIC LUTHERAN UNIVERSITY

Class Schedule

FALL - 1969

TENTATIVE SPRING - 1970



Tacoma, Washington 98447

GENERAL REGISTRATION DIRECTIONS

1. All students currently in school, who plan to register for the following semester, (summer excepted) should register by Advance Registration, to avoid any long registration lines.

2. New students and students returning to the University, after the absence of a semester or more (summer excepted) should register in person. Exceptions to this rule are for special courses off campus, part-time students, and those who have pre-registered by mail.

3. Selective Service - Attention All Male Students
   If you want your local draft board notified of your full-time enrollment at PLU, it is your responsibility to complete a form in the Registrar's Office. This is normally done only once a year.

4. V.A. Benefits
   If you expect to receive any type of veteran or war orphan benefits, you must file your certificate of eligibility in the Registrar's Office. Forms and information concerning veterans benefits are available in the Registrar's Office. Make application when registering.

5. Be certain to read the general University requirements on pages 41 and 42 of the catalog.

6. Obtain your registration materials at the Registrar's Office.

7. Secure an appointment with your adviser. DO THIS IMMEDIATELY.

8. Print with a BLACK LEAD PENCIL on your official program.

   a. Fill in all personal information including your Social Security Number. If you do not have a Social Security Number, you must secure one prior to registering.

   b. Enter courses and credits in the space provided. Be sure you have indicated the section, lab and discussion group if these are designated in the printed schedule.

   c. If you have work, transportation, or other activities that will affect the arrangement of your schedule, note them in the area provided.

   d. Print an "A" before audit courses, "R" before repeat courses and "P-F" before pass-fail courses, in the column provided.

   e. Check to be certain that you have the pre-requisites as indicated in the catalog for courses you select.

   f. List alternate courses which can be substituted if courses on your original schedule are closed. The listing of alternate courses may prevent a change of registration in the fall.

   g. Obtain permission signatures where indicated in the time schedule.

   h. If you have a known conflict of hours, obtain written permission for the conflict from the department concerned. Authorization signatures must appear in the instructor area of the official program.

   i. Obtain the signature of your adviser if you are a full-time student.

Advance Registration Only

A. Leave your registration materials with the Registrar's Office.

B. In advance registration, programs are accepted by class, with seniors first; then juniors, sophomores and freshmen. Every effort is made to comply with your requests. If a course is closed, an approved alternate will be substituted.

C. You will be mailed a statement of charges, a copy of your scheduled classes, additional instructions and cards.

D. Return your payment and the other information requested, by the due date indicated.

E. If your payment is received by the due date, your registration will be complete. If your payment is not received by the due date, your registration will be cancelled and it will be necessary for you to register in person. You will be notified of the due date when you receive your registration materials in the mail.

In Person Registration

A. Obtain the necessary cards at the Registrar's Office.

B. Complete all cards. Obtain adviser's approval if full-time.

C. Report to the Registrar's Office to be scheduled.

D. As soon as you are scheduled and receive a copy of your program, report to the Business Office to pay your fees.

PASS-FAIL OPTION

Details concerning the pass-fail option may be obtained at the Registrar's Office.

SCHOOL CALENDAR 1969 - 70

First Semester 1969-70

Orientation days	Sunday, September 7-Saturday, September 13
Registration	Monday, September 8-Wednesday, September 10
Classes begin 7:50 a.m.	Thursday, September 11
Last date for adding a course	Monday, September 22
Last date for discontinuing a course without receiving a grade	Thursday, October 2
Mid-semester	Friday, October 31
Thanksgiving Recess begins 12:30 p.m.	Wednesday, November 26
Thanksgiving Recess ends 7:50 a.m.	Monday, December 1
Examinations	Monday, December 15-Friday, December 19
Semester ends	Friday, December 19

Interim Period 1970

Begins	Monday, January 5
Ends	Wednesday, January 28

Second Semester, 1969-70

Registration	Thursday, January 29-Friday, January 30
Classes begin 7:50 a.m.	Monday, February 2
Last date for adding a course	Friday, February 13
Last date for discontinuing a course without receiving a grade	Monday, February 23
Mid-semester	Friday, March 20
Easter Recess begins 12:30 p.m.	Wednesday, March 25
Easter Recess ends 7:50 a.m.	Tuesday, March 31
Examinations	Monday, May 11-Friday, May 15
Semester ends	Friday, May 15
Baccalaureate Service, 11:00 a.m.	Sunday, May 17
Commencement 3:30 p.m.	Sunday, May 17

CLASS SCHEDULE

The 1969-70 Class Schedule offerings are listed alphabetically, according to departments and schools.

Courses open to freshmen and sophomores are numbered 101-299, and are considered lower division subjects. Courses open to juniors and seniors are numbered 300-499 and are regarded as upper division subjects. Courses numbered 500 are open to graduate students only.

Upon the approval of his adviser and with the consent of the instructor, a lower division student may be assigned to an upper division course if the pre-requisites for the course have been met.

The time for courses is given according to periods in the day, except for certain day and evening courses where the hour and day are given.

The University reserves the right to cancel any class for justifiable cause.

REGISTRATION GUIDELINES

ART

Art 110 Art and Civilization replaces Art 110 and Art 180.
Art 160 Pictorial Design replaces Art 120 and 160.
Art 235 Materials Design replaces Art 230.
Art 340 The Visual arts and Education replaces Art 340.
Art 340x Art Education:Elementary should be taken by students who have previously completed only Art 110 or Art 111.
Art 350 Sculpture replaces Art 250 and Art 350.
Art 365 Painting replaces Art 265 and Art 365.

BIOLOGY

Courses for juniors or seniors will follow the current catalog description at the discretion and approval of the biology adviser. Waivers will be allowed should problems arise in meeting requirements due to the transition to the course system.

Students from other departments that require supportive work in biology will follow the outlines in the current catalog. Course names and numbers will remain the same.

Because the majority of the courses in biology are four credits in value, they will transfer directly over to the new course program. Exceptions to this rule will be that Independent Study (497, 498) and Seminar (481, 482) may be taken for one-quarter or one-half course credit.

It is imperative that students request advisement from biology staff members so that they may be kept informed of the continuation of curriculum studies and changes which will carry on through next year.

New courses not described in the 1969 catalog:

Biology 111, 112. Biology and Modern Man
Non-major students should register for this course. Upon completion students may elect to major in biology and should consult with the Chairman for details.

Biology 151, 152.
Students planning to major in biology should request advisement by members of the biology staff, and should take Organismal Biology (151) and Cellular Biology (152) during the course of the year. One of the beginning chemistry courses will generally be carried in addition to Biology 151, 152, at the discretion of the adviser.

Biology 280. Intermediate Botany
Students who have completed Biology 101, 102 and are interested in additional botany should register for this course.

Courses listed in the catalog which will not be offered:

Biology 101, 102.
Biology 131, 132.
Biology 141, 142.

BUSINESS ADMINISTRATION

In addition to the general university requirements and electives in Business Administration,* candidates for the BBA degree will be expected to complete the following:

BA 211	Financial Accounting
BA 212	Accounting Information Systems
BA 290	Law and Society**
BA 350	Industrial Management***
BA 364	Managerial Finance
BA 370	Marketing Systems
BA 455	Business Policy

* A minimum of three courses in addition to the economics courses specified below.
** Or any business law course completed before June 1, 1969.
*** And BA 450, Manufacturing Management if no Production or Office Management course is completed prior to June 1, 1969, and the student has not taken BA 351, Organization and Management.

Required Economics courses for the BBA degree:
Economics 150, Principles of Economics, or equivalent.
Economics 241 or 441, Statistical Methods, or equivalent.
One other upper division Economics course.

Electives in major and from other departments to be carefully selected with the adviser's consent because of the different professional objectives in the major concentrations available to the Business Administration student.

Students calculating the converted allowable maximum of business courses should deduct 12 hours of required economics courses or the number of hours taken in economics, whichever is larger, from the 60 hours maximum. Each new course in Business Admisitration should be calculated as equivalent to 4 hours. Fractions should be rounded to the next full higher number, Remainder will be the maximum business hours allowed.

Students calculating the converted required minimum of 52 hours in Business and Economics should be calculated in the same manner except that fractional hours should be rounded down.

CHEMISTRY

All courses will carry one course unit of credit. Courses not mentioned below will continue under the previous numbers and titles. Students who have taken Chemistry-Physics 109, 110 and wish to complete the equivalent of a year of chemistry may take Chemistry 300 for 3 hours credit the first summer session of 1969 or for one course credit the spring term of 1970. Chemistry 300 will then be replaced entirely by Chemistry 142 in 1971.

Requirements for a major under the new program:

B.A. or B.A. in Ed.: Chemistry 115 or 131, 142, 203, 204, 311, 312, 321, with the prerequisites of a year each of college level physics and calculus.

B.A. with American Chemical Society certification:
The above courses plus Chemistry 322, 422, 441 or 442, and either 401 or 304 or an upper division mathematics or Physics course.

Chemistry majors already in progress will need to fulfill any of the above requirements which they have not already met by equivalent courses under the previous curriculum. Majors in other departments will find exact equivalents of previous courses as supportive to their majors. Junior B.S. majors should take Chemistry 311 and 321 the fall term, 312 and 322 the spring term. Senior B.S. majors should normally take Chemistry 401 or one of its alternatives listed above, 441 or 442, and 322.

New courses not described in the 1969 catalog:

Chemistry 115. General Chemistry
The structure of matter, atomic and molecular theory, quantitative relationships. Prerequisite or corequisite: Mathematics 133. See also 131 below.

Chemistry 131. Chemical Principles
Fundamental chemical theory applying elementary Calculus. Prerequisite: High school chemistry. Corequisite: Mathematics 151. Students meeting these requirements are urged to register for Chemistry 131 rather than 115.

Chemistry 142. Systematic Inorganic Chemistry
Study of the elements grouped according to the periodic table, including qualitative analysis and radiochemistry. Prerequisite: Chemistry 104, 115, or 131.

Chemistry 321. Quantitative Analysis
Volumetric, gravimetric, and other selected techniques for quantitative determinations. Prerequisite: Chemistry 142, Mathematics 133.

Courses listed in the catalog which will not be offered:

Chemistry-Physics 109, 110 - replaced by Chemistry 115 or 131 and the corresponding physics course.
Chemistry 301 - replaced by Chemistry 321.
Chemistry 309 - incorporated into Chemistry 401.
Chemistry 314 - incorporated into Chemistry 311.
Chemistry 315 - incorporated into Chemistry 312.
Chemistry 412 - deleted without replacement.

ECONOMICS

For 1969-70, a major in economics shall consist of a minimum of eight courses including Economics 150, 211, 241 or 441, 351, 352, and 496. The remaining two courses to meet the minimum requirements may be selected from among Economics 321, 331 361, 362, and 434.

For returning students who wish to continue under the earlier requirements for a major in economics the requirements are:

Economics 101, 102 or 150, 211, 241 or 441, 301 or 351, 302 or 352, 496, and one elective selected from among any for the additional upper division courses offered by the Department of Economics.

For transfer students and returning students who wish to meet the new requirements for a major in economics.

1. Specific course requirements
   a. Six semester hours or 10 quarter hours in Principles of Economics more than satisfy the requirement of Economics 150. With three semester hours of five quarter hours in Principles of Economics the student should, in 1969-70, take either Economics 101 or 102 as determined by the Department of Economics. These courses will not be offered in subsequent years. Beginning with 1970-71, the student should plan, in consultation with the instructor, to take half of Economics 150.
   b. A three semester hour or five quarter hour course in the same general subject as specifically required course will satisfy the specific course requirement.
2. To meet the requirement for 8 courses.
   a. Semester system:
      Number of courses still required =

$$8 - \left(\frac{\text{Semester hours previously earned in Econ.}}{4}\right)$$

   b. Quarter system:
      Number of courses still required =

$$8 - \left(\frac{\text{Quarter hours previously earned in Econ.}}{6}\right)$$

   c. In the above formulas round any fractional results to the nearest whole unit, with 1/2 course rounding down.

Course identification:

1. Economics 150, Principles of Economics, is a one semester survey spanning the subject matter currently described under Economics 101 and 102. The course is available for upper division credit.

2. Economics 241 is identical to 441.

3. Economics 351 and 352 are simply a renumbering of what are presently listed as Economics 301 and 302, respectively.

4. All other course numbers and descriptions remain unchanged.

EDUCATION

During the period of transition there will be dual programs in effect. Students' programs should be planned with both the academic adviser and an education adviser.

Secondary Professional Semester: This is a block approach for secondary education students. Students must have completed Introduction and Human Development in order to follow this program. This program will enable a student to take methods (secondary), reading, and student teaching concurrently. This program will require a student to plan his education schedule for periods 1 through 8. Another course may be taken later than 8th period.

Education 201, Learner and Society replaced Education 201, Introduction to Education and Education 301, Human Development.

Education 463, Student Teaching, and Education 461, Methods, Curriculum, Student Teaching (Alternate Level Teaching) will be scheduled to include the interim with all day teaching on two levels (elementary and secondary).

Education 460, Professional Seminar, required of all students taking student teaching.

ENGLISH

For the major in English, eight courses are required in addition to English 101. Of these eight, at least four must be upper-division. All English majors, including those enrolled in the School of Education, must present two years of one foreign language at the college level, or equivalent proficiency.

The following courses must be included in the eight required of all English majors:

English 241 American Literature: To the Civil War
English 251 English Literature: To 1750
English 252 English Literature: After 1750
English 383 Shakespeare

Students enrolled in the School of Education must meet two additional requirements in the distribution of the eight courses: one course in the nature and development of language (382, 400, or 403); and 218 (or proficiency in advanced composition as determined by the English Department).

The senior English major should enroll in English 383, Shakespeare if he has not already taken a course in Shakespeare. He may then complete his major by taking any literature courses offered, being careful to include both English and American literature. At least half of his major courses should be upper-division.

The junior or sophomore English major should be able to complete the major program as outlined above with no difficulty.

If a student has earned 12 hours in English under the semester system, he should plan to take 4 additional courses; if he has earned 15 hours, 3 additional courses; if he has earned 18 hours, 2 additional courses; if he has earned 21 hours, 2 additional courses; if he has earned 24 hours, 1 additional course. In none of these combinations may English 101 be included in the work counted towards the major.

FOREIGN LANGUAGES

A major in any language will consist of 8 courses which must be numbered above 202. The required major courses are 321, 351, 352, plus 5 additional courses. Majors are offered in French, German, and Spanish.

The mathematical conversion rule from credit hours to courses in use throughout the university will, of course, also apply to the foreign language department.

After completion of the intermediate level course, there is no particular order in the sequence of subsequent courses, but a student should, if possible, complete 321(Civilization and Culture) and 35, 352 (Composition and Conversation) before proceeding to the 400-level courses. The student and adviser should note that the 400-level courses are generally offered only in alternate years.

Courses which will count in lieu of old courses:

French	321	replaces	221, 222
	421, 422	replace	403, 404, 405
	431, 432	replace	406
German	321	replaces	335, 336
	351, 352	replace	221, 222, 352
	421, 422	replace	371, 372, 401
	431, 432	replace	402
Spanish	421, 422	replace	301, 302

Courses a junior or senior may take next year:

French 101, 102; 201, 202; 351, 352; 421, 422; 497, 498

German 101, 102; 201, 202; 321; 351, 352; 421, 422; 442; 497, 498

Spanish 101, 102; 201, 202; 351, 352

Greek 201, 202; 311, 312

Latin 101, 102; 201, 202

Norwegian 101, 102; 201, 202

Courses majors in other departments should (could) take as supportive work (beyond the language requirement of the College of Arts and Sciences):

French 321; 351, 352

German 321; 351, 352

Spanish 321; 351, 352

Norwegian 321

GEOLOGY

No changes in course titles or numbers are being made, although existing content will be tailored to meet the modified semester.

HEALTH AND PHYSICAL EDUCATION

Four "quarter-courses" in physical education are required for graduation.

Freshmen (1969-70) must include Physical Education 100, Orientation to Physical Education, as one of the 4 quarter-courses. This course should be taken by freshmen during the freshman year.

Freshmen may elect one quarter-course in physical education prior to completion of Physical Education 100.

Sophomores, juniors and seniors (1969-70) may elect any four quarter-courses offered by the Department of Physical Education to satisfy the physical education graduation requirement. Physical Education 100 may be elected by sophomores, juniors and seniors (1969-70) but this course is primarily for freshmen.

Students with physical limitations who feel they cannot complete the physical education graduation requirement must be examined at the PLU Health Service. Recommendations for exemptions or limitations in the physical education requirement will then be submitted by the Director of the Health Service to the Director of Physical Education and Athletics.

All requests for waiver of the physical education requirement are to be made to the Director of Physical Education and Athletics.

HISTORY

The graduation requirements are changed only slightly. In place of 103, 104, the students will now be taking 107, 108. In place of 203, 204, the students will now be taking a choice of two from 251, 252, 253. Seniors majoring in history will choose one of the other of two seminars, 497 or 498, depending upon their American or European concentration.

The 30-hour requirement for a major in history will be changed to 8 courses. This means, for example, that a major who has taken 24 hours in history, which under the old system equalled 6 courses, will be asked to take two more courses.

All students will continue just as before, with increased attention to the individual needs which will be experienced in the transition. Every effort will be made to accommodate the necessities of each student so that he will not be penalized because of the transition and will be able to finish his course in the normal time. Each program will be examined for equivalencies and courses will be added to the program in lieu of old courses as they are needed.

The requirement of professors' consent for certain upper division courses is especially to be noted.

History 351, The Pacific Northwest, is now for students of junior or senior standing only. History 107, 108 and 251, 252, 253 will no longer be survey or introductory courses, but will be very much more substantial courses the requirements for which are substantially increased.

It is to be noted that there are no more period courses in the American division being offered.

Advisers should be especially aware of the close affinity between upper division history courses and certain courses in Art, Philosophy, English and Religion. As often as possible, it is to the student's advantage to be taking courses during the same year which buttress one another.

Under the new system of courses, the Department of History will be making an increased emphasis upon reading, writing and research.

Independent Study courses 491, 492 are eliminated altogether. We expect to have no more need for these courses in view of the fact that we have infused a greater degree of independency and student responsibility in the courses which we have developed for the new system.

New courses which will be counted in lieu of old courses:

Old	New
History 103, 104	107, 108
History 203, 204	251, 252, 253
History 210	351
History 241, 242	301, 302
History 301	311
History 311, 312	312
History 333, 334	321
History 337, 338	322
History 351	251
History 401, 402	331, 332
History 441	333
History 444	340
History 451, 452	451
History 456	356
History 421	421
History 462	461
History 375	471
History 497, 498	497
History 495, 496	498
History 501	501
History 597, 598	590

Juniors and seniors will be able to take courses chosen from 300 and 400 numbers listed. They may also, of course, take courses with lower numbers if there is a need. It is recommended that whenever possible a student consult with the professor in charge before taking any of these upper division courses. In some cases the consult of the professor is required (see Catalog).

American History majors will most likely choose from 337, 351, 356, 451, 461, 471, and 497.

European historians will most likely choose from 311, 312, 321, 322, 421, and 498.

Both American and European candidates may choose from 301, 302, 331, 332, 333, and 340.

The American History courses will be offered every year insofar as we are able to do it in addition to 301, 302. Except for the European Seminar, number 498, and The History of Ideas: European Civilization, number 421, the European History courses will be offered on a 2-year cycle. For example, if a student enrolled in 321, he would undoubtedly in the Spring enroll in 322. He would not be able in that year to enroll in 333, or 340. They would not be offered. If a student enrolls in 311, he will undoubtedly take 312. He could not during that year enroll in 331 or 332. Those courses will not be offered.

Courses which we can conscientiously suggest for majors of other departments and schools are as follows:

Sciences	Education	Bus. Admin.	Nursing
107, 108	107, 108	107, 108	107, 108
251, 252, 253	251, 252, 253	251, 252, 253	251, 252, 253
421, 471	351	451, 471	351, 421, 471

English	107, 108
Religion	251, 252, 253
Philosophy	301, 302
Art	311
Music	312
Speech	321, 322, 331, 332
	421, 471

Sociology	107, 108
Pol. Sci.	251, 252, 253
Economics	311, 332
Psychology	451, 421, 471

MATHEMATICS

Requirements for the Bachelor of Arts degree with a major in mathematics shall consist of a minimum of 7 courses in mathematics numbered above 150 including Math 252 and at least 3 upper division mathematics courses selected from Math 433, 434, 455, 456. (Students planning to do graduate work in mathematics should definitely complete all four of these courses.) Two courses in Physics are strongly recommended.

Requirements for the Bachelor of Science degree with a major in mathematics shall consist of a minimum of 10 courses in mathematics including Math 252 and at least 5 upper division mathematics courses. At least 3 of the upper division courses must come from Math 433, 434, 455, 456. (Students planning to do graduate work in mathematics should definitely complete all four of these courses.) Two courses in Physics are required. Mathematical Physics 456 may be substituted for one course of upper division mathematics.

Suggested changes for mathematics preparation in education major programs:

Senior High School Preparation: 11 courses

Teaching Major: 7 courses in addition to Math 440e
Prerequisites: Math 133 or equivalent
Required: Math 151, 152, 231, 433, 440e; 321, 434, or 455; one additional upper division course
Suggested supporting courses: 2 courses in Chemistry or Physics and 2 additional science courses.

Junior High School Preparation: 11 courses

Teaching Major: 6 courses
Prerequisites: Math 133 or equivalent
Required: Math 151, 152, 231, 440e, 433
Teaching Minor: 4 courses in addition to Math 440e
Prerequisite: Math 133 or equivalent
Required: Math 151, 152; 127 or 231; 440e: 433 or 321

Elementary School Preparation: 12 courses

Teaching Major: 4 courses in addition to Math 318 and Math 320 or 321.
Prerequisite: Math 133 or equivalent
Required: Math 151, 152; 127 or 321 or 433: plus mathematics electives
Teaching Minor: 2 mathematics courses in addition to Math 318, and Math 320 or 321, to be determined in consultation with the School of Education and the Department of Mathematics

Seniors should take a sufficient number of courses (counting any they take as a 4-semester hour course) to build their total credits to what they presently need for a major. Check with the department for a waiver if this conversion creates a hardship.

Juniors should use the same formula as the seniors. Note that 433 and 455 will be offered the first semester every year while 434 and 456 will be offered the second semester on alternate years (434 in 1969-70, 456 in 1970-71).

In general, count each math course taken next year as equivalent to four semester hours. See the department for waivers if this raises your total hours too much.

Anticipated course offerings of the math department:

Math 101 Intermediate Algebra
Math 127 Finite Mathematics
Math 133 College Algebra and Trigonometry
Math 151, 152, 231, 252 The Calculus Sequence
Math 318 Modern Elementary Mathematics
Math 320 (1/2 course) Geometry for the Elementary School Teachers
Math 321 Geometry (offered 1970-71)
Math 341 Mathematical Statistics (offered 1970-71)
Math 351 Applied Mathematics
Math 433, 434 Modern Algebra
Math 440e (1/2 course) Mathematics in the Secondary School
Math 455, 456 Mathematical Analysis
Math 460 Elementary Topology (1969-70)
Math 495, 496 Seminar
Math 497, 498 Independent Study

Math 133 replaces the present 112 and 131.
Math 318 replaces the present 319.
Math 433, 434 is a unification of the present 333, 433 and 434.
Math 455, 456 is a name change of the present Advanced Calculus.
Math 127 is a new course to replace 101. 101 will not be offered for credit after 1969-70.
Math 318, which replaces Math 319, is required of all elementary teaching majors and is a prerequisite for Ed. 319.

The Fall offering of Math 101 is the last time it will be offered for credit. Its replacement, Math 127, has a prerequisite of high school algebra and geometry.

MUSIC

The Music 120 SURVEY specifies the general University requirement for a course in the Fine Arts. It deals primarily with the historical survey of significant music literature. Students with an exceptional music background or those considering music as a major, should enroll rather in Music 111, THEORY. Music 111 will thenceforth have a great deal of emphasis on Literature as well as Theory.

All students desiring to participate in one of the University performing groups will register for the appropriate section of Music 130 - 430 LITERATURE AND PERFORMANCE.

All Freshmen will register for 130 + section
All Sophomores " " " 230 + section
All Juniors " " " 330 + section
All Seniors " " " 430 + section

Sections should be determined as per class schedule.

All students desiring private lessons in Voice and/or an instrument, will register for the appropriate section of Music 150 - 450 PRIVATE LESSONS.

All Freshmen will register for 150 + section
All Sophomores " " " 250 + section
All Juniors " " " 350 + section
All Seniors " " " 450 + section

Music majors needing Elementary Music Methods will register for Music 340 (½ course).

Education students needing Music Methods for Elementary School will register for Music 341 which is a full course and combines the previous Music for Elementary Teachers and Fundamentals of Music.

Certain Education students may be exempt from 341 and permitted to register for the ½ course 340 provided one of the following conditions applies to them:
1. Already have completed a course in Music Fundamentals or Music Theory
2. Can give satisfactory evidence of reasonable music background, including a basic keyboard facility to the Instructor (Mr. Gilbertson)

All Music majors needing or desiring Music Literature and/or Counterpoint and/or Form, will register for Music 411, Literature and Analysis.

Music 445, Advanced Conducting, combines and replaces Music 443 and 445 (Choral and Instrumental Conducting). As with the displaced courses, Music 445 will divide its emphasis between Practical Conducting and Methods and Materials. Therefore half of the course may yet be counted as a Methods course for certification.

NURSING

Programs for students currently enrolled in the School of Nursing will be worked out individually with each student. Incoming freshmen will take the following courses:

Fall Semester		Interim	Spring Semester	
* English 101	1		* Religion 103	1
Biology 162	1		Biology 162	1
Chemistry 103	1		* Sociology 101	1
* Psychology 101	1		** Fine Arts Elective	1
H & PE Activity	½		H & PE Activity	½
	4½			4½

* May be taken either semester of the year.
** May be taken at any time.

In addition to regular University costs, students are to provide their own transportation between the University campus and the clinical laboratory areas. Students are usually able to establish car pools in the sophomore and junior years. During the senior year, each student must have access to a car for individual use. Students are expected to carry professional liability insurance during their sophomore, junior and senior years. This is available under a group plan at nominal cost to the student. Health examination fees and student uniforms (approximately $70.00) are the responsibility of the student.

PHILOSOPHY

In the area of philosophy the transition from the credit hour to the course system should occasion no particular difficulty. The university requirement in philosophy can be fulfilled by taking any course in the subject except Logic (233). A major in the subject will consist of a minimum of six courses including Philosophy 233, and any three of the following: 331, 332, 333, 334, and 335. In addition to course requirements all majors must (1) complete a prescribed reading program (described in a special brochure available from the department), and (2) take a departmental examination before beginning their final semester in residence.

PHYSICS

In registering students in physics advisers should refer to the memo describing the new program which appeared in the faculty agenda of the February meeting.

Any student who has taken the present program (1968-69) in the normal sequence should enroll in the suggested program (see above memo) for the succeeding year in the new program (1969-70). Pre-engineering and physics majors who have completed Chem-Physics should register in Physics 251. Students who have taken Chem-Physics and need the equivalent of one year of physics should register in either Physics 251 or Physics 201. These two courses will be offered for the last time in the fall of 1969.

Seniors who have completed Electromagnetic Theory (Physics 331, 332) should register for Physics 401 and Physics 421 the first term and Physics 406, 456 and 422 the second term.

The prog am for juniors remains unchanged for next year. Those who have completed Mechanics (Physics 256) and Circuit Theory and Instrumentation (Physics 272) should register for Electromagnetic Theory (Physics 331), Physical Chemistry and Advanced Applied Math (providing they have completed the pre-requisites) the first term.

Physics 101 plus Physics 102 will be the equivalent of our former one-year course for non-majors. If students in other fields, particularly biology, chemistry and math, have room in their programs for at least one additional course in physics, they should be encouraged to follow 101 with 253 and 254. Physics 211 will be an elementary treatment of modern physics and is intended for non-majors.

The requirements of a B.S. degree with a major in physics will consist of 10 courses. These 10 courses include Basic Concepts (Physics 101) and 1/4 hour of advanced laboratory or research in each of the last four terms. Students may be advance-placed in Physics 253, in which case the requirement for a major will be 9 courses.

Special attention should be given to our new B.A. degree in physics which is designed specifically for prospective teachers. This program includes 7 1/2 courses: Physics 101, 102, 211, 253, 254, 272, 321, 322, and 355.

POLITICAL SCIENCE

The introduction of the 4-1-4 calendar has necessitated some revision of courses in the Department. The modus operandi published with the 1969 catalog will be observed by the Department. In many cases new courses will carry the same course title as old courses, and in these cases the new course will count in lieu of the old course. In other cases two old courses have been combined into one new course, e.g., P.S. 336 International Organization and Law and P.S. 254 State and Local Government. In these cases a student should not take the new course if he has previously received credit for one of the two old courses.

A major in political science will consist of at least 7 courses in political science including P.S. 101 (or 301), P.S. 251, P.S. 315 and P.S. 316. A teaching major will consist of at least 7 courses in political science including P.S. 101 (or 301), P.S. 251, and P.S. 331. Each junior or senior majoring in political science must at each registration have his program approved by the Chairman of the Department, who will normally also be his academic adviser. The non-major should consult his academic adviser as to supportive work in political science keeping in mind that members of the staff of the department will be happy to be consulted and are able to explain the content of each course and suggest its values.

A student in the Urban Affairs Program should plan his program in consultation with Dr. Lowell W. Culver.

Political Science 101 (or 301) remains the prerequisite for all other courses in the department.

PSYCHOLOGY

The requirements for a major in psychology are: Psychology 101 and 243, preferably in the freshman year; 460; one of 340 or 410; one of 305, 320, 420 or 421; 490; two additional full course credits taken from those listed as offered by the Department of Psychology below the 500 level. A course in statistics is also required.

Majors in the Department of Psychology will write a preliminary comprehensive examination during the first semester of their senior year. Reading or other work during the senior interim will be directed toward making up of any deficiencies and in preparation for a fianl comprehensive examination during the last semester.

The following courses are to be offered during the academic year 1969-70. They are full courses except for those noted.

Psychology 101 Introduction to Psychology
A prerequisite to all other courses in Psychology except 110 and 441.

Psychology 110 Study Skills
A half course.

Psychology 221 The Psychology of Adjustment
A half course.

Psychology 243 Scientific Methods in Psychology
Replaces 240, Elementary Analysis, and incorporates material from 390, The Experimental Psychology of Perception, which will not be offered.

Psychology 305 The Childhood and Adolescence
Temporarily replaces 401, The Psychology of Infancy and Childhood.

Psychology 320 Social Psychology

Psychology 340 The Biology of Behavior
Prerequisites: 101 and 243 (240)

Psychology 405 Adolescent Psychology
Prerequisites: 101, 305 or Educ. 301

Psychology 410 Emotion and Motivation
Prerequisites: 101 and 243 (240)

Psychology 420 Psychology of Personality
Prerequisites: 101 and at least one full course in psychology beyond the 200 level.

Psychology 421 Behavior Disorders
Prerequisites: Psychology 420 or consent of the Department.

Psychology 441 Statistical Methods
This course does not fulfill the requirement for a course in the social sciences.

Psychology 450 Psychological Testing
Prerequisites: Psychology 101, 243 (240) or 441 and at least two additional full courses in psychology beyond the 211 level.

Psychology 460 The Experimental Psychology of Learning
Prerequisites: At least three full courses in psychology including 243 (240).

Psychology 490 History and Systems in Psychology
For senior students only.

Psychology 497, 498, 499 Independent Study
One quarter to one-half course, to be taken during the Interim, except by special consent. Prerequisite: Consent of the Department.

Psychology 515 Psychological Assessment
Replaces 510, Personality Assessment, and 520, Individual Psychological Testing. Prerequisite: Psychology 450.

Psychology 540 Counseling Theory and Practice
Prerequisite: Psychology 450.

Psychology 560 Psychology of Learning
Prerequisite: At least three full courses in Psychology above the 200 level.

Psychology 570 Practicum in Counseling and Testing
Prerequisites: Psychology 450 and 540.

Psychology 577 Supervised Field Work
Prerequisite: Psychology 570.

Psychology 596, 597 Independent Research
One quarter to full course credit. Prerequisite: Permission of the department.

Psychology 598 Thesis and Thesis Seminar
Students writing a graduate thesis will be required to attend a seminar during two semesters, or longer if the thesis is not completed.

RELIGION

Religion 103 or 203 shall be taken before the end of the sophomore year. The second course may be the other lower division course, an upper division course, or the senior seminar in Religion.

SOCIOLOGY

Majors will be required to take at least 8 courses. Either Sociology 101 or 220, 521 and 550 must be included in those 8 courses. The remaining five courses must be distributed so that 2 come from courses in the 200-300 category and 3 come from the 400 category. The student will choose these courses in consultation with and upon approval of his adviser. It is our feeling that we can better meet the needs of the individual student and at the same time assure ourselves that he will be getting an exposure to the basic essentials of the field.

We have agreed, however, that the eight courses of the major may not include Sociology 405, 408, or 421. These courses are specifically oriented to social work and therefore do not fall within the mainstream of sociology. Sociology majors doing the kind of work that involves them in the community as sociologists will be taking the course Sociology 497, Independent Study.

The Department of Sociology holds membership in the Council on Social Work Education. Students planning to seek employment in the helping services or planning to attend graduate schools or social work should follow the social welfare sequence of courses provided by the Department: Sociology 401, 405, 408 and 421. Enrollment in these courses is open to any student majoring in any other field as long as he has taken Sociology 101 or 220 or their equivalent. Students seeking to enter the social welfare field should consult the Department of Sociology for supporting courses during their four years in college.

Candidates for the Bachelor of Arts in Education degree who are planning a teaching major in Sociology should pursue this program:

Senior High Preparation: 13 courses
Teaching Major: 8 courses
Required: Sociology 101 or 220, 521, 560 and 5 courses distributed among the other levels upon consultation with and approval of the department.
Supporting Courses: Five courses from the other social sciences will be chosen through consultation with and approval of the department.

In the present catalog, the Department of Sociology lists 28 different course offerings and three courses that are listed as cross-referenced courses being offered in other departments. Through the process of restructuring content now being offered in present courses, combining courses and eliminating certain courses the number of courses will be 20. The number of cross-referenced courses offered in other departments will depend on the kinds of courses offered by those departments under their new proposals. These will undoubtedly include statistics.

Under the column headings below we list the previous course offerings and the new course offerings.

Previous Offerings - 28 Courses	New Offerings - 20 Courses
101	101
202	220
275	275
300	310
301	325

Commentary of New Courses:

Sociology 101 Social Issues
In an effort to provide a more meaningful introduction to the field of sociology while avoiding the "shot-gun" approach characteristic of many introductory courses, we are proposing to introduce the student to the basic concepts and tools of sociology through an analysis of several of the contemporary social issues. Such an approach permitted us to combine the purpose of two previous courses, Sociology 101 and 202.

Sociology 220 Contemporary Sociology
Students who definitely know that they plan to major in sociology when entering college or who are more interested in sociological theory may enroll in this course. This could also be used by students who have had a sociology course in high school. It will be an analysis of contemporary leaders, their theories and methods of research.

Sociology 275 Group Behavior
This course remains basically the same. More time now can be spent to examine those concepts and ideas that incorporate the aspects of social control.

Sociology 310 Social Disorganization
This course deals with the way in which social interaction and processes operate in social organization, social disorganization and the consequences of disorganization.

Sociology 325 Migration
The history, nature and problems of minority groups in American society will be examined. Though major emphasis will be given to the processes of interaction between minority groups and the majority group in American society, population analysis and population movement will also be treated. Thus the concepts usually covered in our Human Migration course will be touched upon.

Sociology 338 Juvenile Delinquency and Criminology
The basic concepts in understanding the factors that contribute to delinquency and crime are much the same. Treatment and rehabilitation programs are categorized in the same way in the two fields. Therefore it seemed feasible to combine these two courses into one. In fact, such an integration will permit students to relate the two fields more successfully and to see the differences, where they exist, more clearly.

Sociology 341 Anthropology
Cultural and physical anthropology are being integrated into one course.

Sociology 401 Sociology of Social Welfare
Previously it was titled, "Introduction to Social Welfare." The conceptual approach is sociological as the way in which societies through time have defined and sought solutions to social and personal needs. This approach is much different than that in present textbooks for such courses under the previous title.

Sociology 405 Social Intervention
The newest offering recommended by the Council on Social Work Education is this one. It examines the various ways in which society may intervene in helping to prevent or to alleviate undesirable social conditions or social problems.

Sociology 408 Social Work
This corresponds somewhat with the previous course entitled, "Introduction to Social Work." With the expanded amount of time, we have been able to add some time for interviewing thus eliminating the necessity of offering it as a separate course.

Sociology 421 Field Experience
It is most desirable to offer a rigorous planned and integrated experience for prospective social welfare persons in the community in some agency or institutional setting. This requires time and effort on the part of the student and teacher and agency people to be successful. It warrants a full course effort.

Sociology 430 The Community
It has been expanded to include more student initiative in exploring related areas of community analysis and study.

Sociology 445 The Family
Since we have not continued the course "Contemporary Marriage Problems" as a regular offering, certain aspects of that course will be added to this course as it was originally taught in the previous listing.

Sociology 450 Social Institutions
The three courses entitled "Contemporary Social Institutions," "The Sociology of Education," and "The Sociology of Religion" have been integrated into this course. The conceptual and theoretical approach to social institutions will be examined by looking specifically at two institutions: education and religion. Students will be given an

opportunity to delve more deeply into one of these two institutions on their own and then to apply this learning to other institutions of society. Their individual in-depth study will be shared by the rest of the class.

Sociology 495 Readings Seminar
Here the student will be provided an opportunity to pursue on his own those areas of sociology in which he is deficient and/or those areas that he needs in view of his program after the baccalaureate degree. Students will be given a chance to share their reading experience with one another.

Sociology 497 Independent Study
This will continue to serve the purpose it has always served. It can also be used for the interim when a student desires to do that. It could also be used by non-majors.

Sociology 521 Sociological Thought
The development of sociological concepts and methods will be traced. Emphasis will be placed on some of the leading sociologists of the past. The relationship of sociology to other disciplines as it developed will be examined. Required of all majors.

Sociology 550 Seminar in Research
Through the use of contemporary research monographs, the student will be given an introduction to the tools and methods of sociological research. Required of all majors.

Sociology 650 Graduate Readings
Graduate students will be given an opportunity through independent reading and consultation to expand their knowledge in those areas that they need to develop to serve their graduate program. Students may take this course twice.

Sociology 697 Graduate Research
Students will enroll in this course as they work on their thesis or research papers.

SPEECH

The program for junior and senior majors is to be worked out with the adviser.

For those now in attendance, provision will be made by the Department if any difficulties arise during the transition from the present system to the course system. These decisions will be made in each individual case.

Eight courses are required for a major in speech.

Speech 101 Fundamentals of Oral Communication includes a course formerly known as 202 and will be the course required for Education majors.

Speech 206 Argumentation and Debate is not listed in the catalog, although it has been given before. It will be required for Speech majors.

Speech 209 Persuasion combines previous courses 307, Persuasion, and 308, Extemporaneous Speaking.

Speech 211 Contemporary Oral Discourse will be required for Public Address majors.

Speech 220 Broadcast Media-Mon and Society is for those interested in the area of broadcasting and will be the first in that interest area and is open to all.

Speech 222 Radio Production takes the place of 226, Broadcast Announcing.

Speech 304 American Public Speaking will be required for those taking a Public Address major.

Speech 310 Stage Technology
and
Speech 311 Scenic Design These two courses replace the three courses identified as 310, Stage Scenery, 311, Stage Lighting, and 312, Costume and Makeup. Some makeup will be given in 216.

Speech 312 History of the Theater This is a new number, formerly 316.

Speech 321 Television Production replaces 327 and will be devoted to television production only.

Speech 337 Speech Science and Pathology replaces 336, Speech Science, and 337, Speech Pathology.

Pol Sci 437 - Principles of Public Administration - Change from MTWRF 8th period - A-212 - Culver to TR - 7 p.m. L-168 - Reichel

Rel 307 - Ancient Church History - M - 7 p.m. - CANCEL

Rel 321 - World Religions - Add Section B - 5th period MTWR - Christensen

Two courses in Religion Senior Seminar - Change number to 490 for both courses.

Section A - This course will be taught in cooperation with the department of physics. Some of the questions which will be handled include the following:

Is the conflict between science and religion irreconcilable?
If so, which must be rejected?
Can science be made a human subject?
Is religion irrelevant to modern man?
Is there a possible synthesis which can serve man?
To what extent can science and religion stem de-humanization of modern times?
What may they contribute to the emergence of the new man, the one humanity?

Section B - This course, taught together with the School of Nursing, will deal with the topic of sex in the broader context of sexuality, femininity, and masculinity. In addition to its biological character, the seminar will delve into the historical, psychological, sociological, moral, and religious dimensions of this man-woman relationship. Much attention will be given to the examination of the traditional, versus the modern humanist views on this topic. The primary objective will be to search out what it means to be human in the expression of one's sexuality, what it is to be free, and what the responsibilities are in this area of basic human experience.
